Advanced Remote Jobs No Experience For Bloggers:

The Personal and the Professional in Aid Work Anne-Meike Fechter, 2016-03-16 This book considers how the personal and the professional dimensions are related and how they matter for aid work The contributions to this edited volume are based on the assumption that all actors are relevant in development including national and international aid workers A key question which the book explores is why the personal so often remains unacknowledged in development studies even though its salience for aid workers is well documented One possible reason is an implicit narrative of aid work as altruistic and self sacrificing which renders it inappropriate to devote much attention to the experiences of development professionals themselves In order to redress this this book critically considers the kind of difference they make and aims to understand how they respond to the challenges of their work The book explores their efficacy as human beings and employees with individual subjectivities social and cultural beliefs and practices and documents how these shape their involvement in development processes This book was published as a special issue of Third World Quarterly

After the Pandemic Randy Whitaker, 2022-10-10 Many things define a job seeker experience education first impressions connections passion and the value you might bring to the company you wish to work for For decades the perceived ideal candidate would have all of the above most of the above however a good candidate would have a four year college degree To a great extent an employer still would like someone with a four year college degree However I believe this is changing The need for those who work with their hands and those who are willing to work their way up through the various levels of an organization is becoming more and more desired by companies The time it will take you to earn your degree you could be making a nice living and will have accrued zero debt in the process Plus after working in an industry of your choice something you do have an interest in even a passion for you may be on equal footing with a newly hired college grad based on the four years you have been working in your industry of choice as you continue to work your way up through the company You will find the more value you bring to a company the more they will look to you to assume great responsibility Typically the more responsibility the greater the paycheck What makes this book timely is the fact as COVID 19 winds down we are seeing many labor shortages in many areas and industries Now is the absolute best time to go to an industry experiencing a labor shortage or enter one of the numerous industries researched in this book and get yourself the job you always wanted without the cost and time involved with getting a four year college education I have nothing against getting a degree and there are still many fields where they will always be mandatory however the trades service industries government railroads law enforcement plus many others will welcome you with open arms without the need for a four year degree I hope this book helps

Fantasies of Virtual Reality Marcus Carter, Ben Egliston, 2024-09-10 The fantasies that underpin common perceptions of Virtual Reality and what we need to know about VR's potential risks as well as its opportunities Virtual reality is the next new frontier for Silicon Valley Mark Zuckerberg who has overseen Meta's investment of billions into VR pitches it as the next dominant computing paradigm More than just a gaming technology VR is top of mind for academics tech reportage and industry evangelists who all see the potential for VR to revolutionize fields such as education and health as well as the way we work and communicate But will VR achieve all this In *Fantasies of Virtual Reality*

Marcus Carter and Ben Egliston strip bare the tech industry's vision of a future dominated by immersive VR experiences challenging the utopian promises of this technology's potential. Carter and Egliston offer a critical account of VR in a variety of contexts from gaming to human resources to policing and the military. They argue that while VR does hold significant potential, the overhyped expectations surrounding it from achieving true empathetic understanding to transforming traditional education and office work are often overstated and fraught with issues of privacy control and exclusion. What's more, there is nothing truly virtual about virtual reality. VR is deeply entrenched in the material world driven by tangible technological, economic, and social logics. An accessible introduction to this emerging technology, *Fantasies of Virtual Reality* is essential reading for anyone interested in what VR can really do and what is just plain fantasy. *The Anti-Ableist Manifesto* Tiffany Yu, 2024-10-08 I defy anyone who reads this powerful and urgently needed manifesto not to be galvanised into action. Sophie Morgan, TV host and author of *Driving Forwards*. A call to arms not just for the disabled community but for every single one of us. Dr Shani Dhanda, broadcaster and author. An actionable antidote to fear and misconceptions. Service95. In *The Anti-Ableist Manifesto*, Tiffany Yu highlights the myriad ways in which our society discriminates against people with disabilities and what we can do about it. Foregrounding disabled identities that have too often been rendered invisible, she demonstrates how ending discrimination begins with self-reflection. From recognising biases to understanding microaggressions, *The Anti-Ableist Manifesto* teaches us how to deconstruct ableism at work, in our communities, and within ourselves. Featuring a foreword by Dr Shani Dhanda, as well as contributions from disability advocates, entrepreneurs, and more, *The Anti-Ableist Manifesto* is an essential guide to going beyond mere awareness and becoming actively anti-ableist.
