How to Publish Academic Books: A Guide to Publishing Monographs, Edited Volumes, Textbooks, and Theses Nitin Liladhar Rane, Saurabh Choudhary, Jayesh Rane, 2024-12-05 The academic book publishing sector has a key function when it comes to knowledge production and dissemination across various disciplines For researchers scholars and educators the process of moving from concept to publication is rarely a trivial task and often involves the use of imagination perseverance and teamwork Publishing a monograph an edited volume or a textbook or turning your thesis into a book can be painful This book will help you demystify the world of academic book publishing offering authors a guide to navigating the complicated process with success This guide aims to provide authors with the knowledge of tools and resources needed to publish a book that reflects their research If you want a sneak peek into the workings of scholarly publishing it features advice from senior authors publishers and academics with an intimate familiarity with the academic publishing process Divided into chapters the book covers the major elements of the publishing journey steps to writing the proposal advice on working with publishers and challenges of the current moment like open access and new fields of study The first step to getting published is learning to write a scholarly manuscript or book proposal Writers need to know how to present their research in front of potential publishers It necessitates then not just a firm grasp on the work in question but a facility for conveying the relevance of the work and its potential to make a difference Therefore it is very important to tread carefully through the relationship with the publishers as the success of publishing partnerships relies heavily on trust collaboration and shared vision for the book Open access publishing for scientific journals has played an increasingly important role in the ever evolving academic world There are new ways for authors to disseminate their work and increase the accessibility of research through open access It is an exciting time to be an author but it is also a challenging time in terms of financial viability and finding new publishing models This section deeply studies the influence of open access so that authors can better develop books around it Many students work years on their theses and getting them published can greatly aid their academic careers It is not simply editing this means changing the format to suit for wider academic publication and conforming to the expectations of the publisher This book is a road map for authors making this transition For authors in emerging or interdisciplinary fields publishing can bring unique challenges There may not be established publishing pathways in these fields or the intended audience may be smaller and more specialized Despite these challenges there are great rewards to publishing in such fields and this book outlines strategies to achieve their success Authors will discover how to seek the ideal publisher determine their target market and how to frame their work to have a noteworthy effect in their area Technological advancements global trends and academic expectations have all combined to shape the future of academic book publishing By the end of this book readers will be equipped with a fundamental understanding of the academic publishing process From preparing manuscripts and working with publishers to navigating new models of publishing this guide arms authors with practical advice and strategies to ensure their research becomes a

published book It is our goal that this book helps those who hope to disseminate their research through publication of scholarly books **Vision, Learning, and Robotics: AI for Plants in the 2020s** Zhenghong Yu, Huabing Zhou, Luca Iocchi, Jeffrey Too Chuan Tan, Changcai Yang, Hao Lu, 2025-01-10 Population growth and climate change have posed significant challenges to crop breeding The identification of crop agronomic traits is fundamental to breeding yet currently the collection of such traits is largely reliant on the subjective judgment of workers or ground test equipment which is both costly and inefficient In recent years the advancement of artificial intelligence AI has revolutionized modern agriculture and plant science AI is a rapidly evolving field with datasets models and algorithms constantly changing It has also been increasingly applied to unmanned aerial vehicles field robots and hyperspectral imaging sensors offering great potential for large scale crop growth monitoring and precision management driving the agricultural field from mechanization to automation and intelligence This research topic aims to encourage research work that actively embraces new AI ideas progress and combines these new ideas technologies with robotics or sensing technologies for applications in plant phenotyping or precision agriculture We encourage the use of technologies that have seen significant development in the AI community after 2020 such as vision transformers and diffusion models The Palgrave Handbook of Supply Chain and

Disruptive Technologies Nachiappan Subramanian, Yasanur Kayikci, Atanu Chaudhuri, Michael Bourlakis, 2025-11-01 Disruptive technologies are revolutionising the supply chain landscape driving innovation and unlocking unprecedented value to achieve radical growth and operational excellence This comprehensive handbook delves into the cutting edge research and dynamic debates surrounding the development of digital capabilities It explores how emerging technologies such as blockchain big data analytics cloud computing artificial intelligence drones autonomous vehicles 5G and more are reshaping the industry By harnessing these technologies organisations can fully capitalise on their transformative potential paving the way for a future of enhanced efficiency agility and competitive advantage International experts contributing to this book provide in depth examinations of emerging design practices the integration of user experience and incremental customisation and the technological interventions bridging build to model and conventional manufacturing They also explore innovative practices in interactive design for product use and assess capabilities through the dynamic interaction between individuals and organisational structures This comprehensive exploration offers invaluable insights into the future of supply chain digitalisation making it an essential resource for achieving operational excellence and radical growth This handbook will be of immense interest to a diverse audience including academics and students in Business and Management Logistics and Supply Chain Management Operations Management Technology Management and Information Management Additionally it will captivate stakeholders managers and practitioners in these fields By offering cutting edge insights and practical guidance this volume serves as an indispensable resource for anyone seeking to navigate and excel in the rapidly evolving landscape of supply chain digitalization The Handbook of Medicinal Chemistry: Principles and Practice Simon E

Ward,Andrew Davis,2023-02-03 The second edition of The Handbook of Medicinal Chemistry is a carefully curated compilation of writing from global experts Using their broad experience of medicinal chemistry project leadership and drug discovery from both industry academic and charity perspectives they provide unparalleled insight into the field in a single invaluable volume **Contemporary Work and the Future of Employment in Developed Countries** Peter

Holland,Chris Brewster,2020-01-23 Whilst only in the second decade of the 21st century we have seen significant and fundamental change in the way we work where we work how we work and the conditions of work The continued advancements of smart technology and artificial intelligence globalisation and deregulation can provide a sleek view of the world of work This paradigm can deliver the opportunity to both control work and provide new challenges in this emerging virtual and global workplace with 24 7 connectivity as the boundaries of the traditional organisation melt away Throughout the developed world the notions of work and employment are becoming increasingly separated and for some this will provide new opportunities in entrepreneurial and self managed work However the alternate or bleak perspectives is a world of work where globalisation and technology work together to eliminate or minimise employment underpinning standardised employment with less and less stable or secure work typified by the rise of the gig economy and creating more extreme work in terms of working hours conditions and rewards These aspects of work are likely to have a significant negative impact on the workforce in these environments These transformations are creating renewed interest in how work and the workforce is organised and managed and its relationship to employment in a period when all predictions are that the pace of change will only accelerate Human-Computer Interaction Masaaki Kurosu,Ayako Hashizume,2025-07-01 This seven volume set
