Artful AI in Writing Instruction Brett Vogelsinger, 2025-05-14 Discover strategies to use AI thoughtfully in every stage of the writing process without compromising creativity or critical thinking. Feeling conflicted about integrating artificial intelligence AI into your writing instruction? You're not alone. In a world where AI-generated text can seem like a writing teacher's enemy, incorporating it into writing instruction may feel like an act of betrayal. The advent of generative AI might feel like one more thing eroding students' capacity for deep thinking. *Artful AI in Writing Instruction* offers strategies and lessons for middle and high school teachers to harness AI in a positive way, integrating it into the writing process and evaluating the ethics of its usage. Written by a full-time high school teacher, Brett Vogelsinger, the book focuses on evergreen principles and ideas rather than specific AI tools, providing concrete steps and lessons that teachers can implement without being technology experts. Acknowledging the varying perspectives of teachers on AI in writing instruction, from skepticism to enthusiasm, Brett offers a human-centered, considered, and ethical approach to using generative AI in the classroom. Demonstrating how AI can be used artfully in the classroom to enhance students' writing skills and foster reflection on the writing process, this book provides standards-aligned lessons that detail how AI can support instruction and assist students at each step of the writing process, from prewriting through publishing. Emphasizes how to use AI tools to mine authentic human ideas and enhance creativity in the classroom. Aims to help teachers build a healthy relationship with AI technology and use it thoughtfully in their writing instruction. Includes chapter features such as quotes from esteemed writers, real teacher and student voices, cautionary notes, and Bot Thoughts entries of example AI output. *Artful AI in Writing Instruction* is a book that explores technology with humility, critiquing its drawbacks and harnessing its strengths in an effort to guide teachers on how to use AI to help students grow their thinking and their skills rather than bypassing that development.

Designing for the User Experience in Learning Systems Evangelos Kapros, Maria Koutsombogera, 2018-09-25 While the focus of the UX research and design discipline and the Learning Sciences and instructional design disciplines is often similar and almost always tangential, there seems to exist a gap, i.e., a lack of communication between the two fields. Not much has been said about how UX Design can work hand in hand with instructional design to advance learning. The goal of this book is to bridge this gap by presenting work that cuts through both fields. To illustrate this gap in more detail, we provide a combined view of UX Research and Design, Educational Technology. While the traditional view has perceived the Learning Experience Design as a field of Instructional Design, we will highlight its connection with UX, an aspect that has become increasingly relevant. Our focus on user experience research and design has a unique emphasis on the human learning experience; we strongly believe that in learning technology, the technological part is only mediating the learning experience, and we do not focus on technological advancements per se, as we believe they are not the solution in themselves to the problems that education is facing. This book

aims to lay out the challenges and opportunities in this field and highlight them through research presented in the various chapters. Thus it presents a unique opportunity to represent areas of learning technology that go very far beyond the MOOC and the classroom technology. The book provides an outstanding overview and insights in the area and it aims to serve as a significant and valuable source for learning researchers and practitioners. The chapter 'User requirements when designing learning e content interaction for all' is available open access under a CC BY 4.0 license at link.springer.com.
