**Artificial Intelligence How Influences** Johnny Ch LOK, 2020-08-14 How can apply AI digital channel to predict consumer behaviors AI digital channel can be applied to help businesses to evaluate whether how much the product price is the most attractive to persuade consumers feel it is the most reasonable price to sell It helps consumers to feel which brands of products which ought change the price to let consumers to choose to buy the brand of product It can be applied to predict whether how many consumer numbers can be increased or decreased when the brand of product's price is variable It aims to give opinions to help any brand of product manufacturers or sellers to judge whether which price is the most reasonable to let consumers to accept to choose to buy the brand of product in popular Thus AI price measurement technology can be preference to be applied online communication ecommerce and mobile phone internet platform aspect As businesses can enter their past products prices data and past customer number data into computer or mobile Then AI price measurement technology can gather these data to analyze these product prices and past customer number to compare their prices variable changing range level to find their price variable difference to measure to make conclusion about every product's price variable changing will influence how many customer number increase or decrease changing to choose to sell their different kinds of products more accurate Then AI price measurement software will help them to analyze all past price variable changing data to compare whether which price range can let customers to feel it is more reasonable and attractive to influence them to choose to buy the product among different brands

of product choice. Because any product's price is one important factor to influence consumers to choose to buy the product instead of quality, durability, shape, appearance, color, brand familiarity, etc. factors. Any online businesses with a focus on Asia should considerate AI customer care and virtual shopping experience whereas in Europe and North America still value face to face and or real human interaction over AI or virtual worlds. For example Amazon publish has applied AI price measurement technology to help authors to decide how much every different topic of e book or paper book price it can attract the largest number of readers to buy. Any one author only needs to type whose book name to Amazon publish author himself herself Amazon website. Amazon publish AI price measurement learning machine will help them to auto calculate and judge how much e book or paper book price is the most attractive and the most reasonable in order to increase reader number to buy their e books or paper books to read. So AI online price measurement machine will gather past similar book names and past every similar book readers reading times and the number of readers to give opinions to let every author to judge whether his/her very new e book or paper book ought charge how much price to the e book or paper book which can attract many readers to choose to buy. Although it is not ensure that the e book or paper book price must let readers to feel it is the most reasonable price to choose to buy in reader's view point. However it has other factors to influence readers choice to buy the e book or paper book e.g whether the book content is attractive to public the author's familiarity the book's page is enough or not to satisfy readers to read etc factors. But instead of all these extra factors to influence readers to choose to buy the book to read AI price measurement learning machine can real give opinions to every author to let them to judge the e book or paper book different price range whether is too high to influence readers to choose to buy to read or too low to influence readers feel it is possible poor content book to compare other similar content books.
