Advanced Remote Jobs Usa For Students:

Incentivizing and retaining public servants in remote areas: A discrete choice experiment with agricultural extension agents in Ethiopia Regassa, Mekdim D., Abate, Gashaw T., Kubik, Zaneta, 2020-07-08 Increased deployment of agricultural extension agents EAs in rural areas is grounded on their importance to spur agricultural productivity and mitigate spatial imbalances in welfare. However, the high turnover and the low motivation levels of EAs in remote areas pose challenges for equitable service provision and in some cases exacerbates geographic disparities. We assess the effectiveness of selected potential policy interventions to incentivize and retain EAs in remote areas of Ethiopia. To this end, we conducted a choice experiment to elicit preferences for job attributes of 761 EAs. We applied a random parameters logit model to estimate parameters of interest and to simulate the impact of possible policy interventions. The main results show that offering continuing education opportunities after two years of service increases uptake of an extension job in remote locations by 77 percentage points, which is significantly higher than the effect from doubling current salary levels (70 percentage points). EAs also expressed a strong preference for work environments with basic amenities, housing, transportation services, and well-equipped Farmer Training Centers (FTCs). Furthermore, the results from sub-sample analyses show that female EAs are less responsive to pecuniary incentives and are more concerned with the availability of infrastructure and services. Current salary levels, years of employment, and location of work are also important sources of heterogeneity in the response of EAs to potential policy changes. **International Journal of Advanced Remote Sensing and GIS** Cloud Publications, 2012-01-01 International Journal of Advanced Remote Sensing and GIS (IJARSG) ISSN 2320-0243 is an open access peer-reviewed scholarly journal publishing original research papers, reviews, case study case reports, and methodology articles in all aspects of Remote Sensing and GIS, including associated fields.
