Essentials of Leadership in Africa Bella L. Galperin, Caren B. Scheepers, 2025-01-15 This concise overview of the theories and practice of leadership in the African context is the first of its kind. *Essentials of Leadership in Africa* introduces leadership as an art and science to inspire confidence and support among the people who need to achieve common organisational goals. We present a framework of leadership which emphasises the role of the African context in better understanding leadership effectiveness. According to our model, leadership in Africa can be understood by focusing on the leader's skills, motives and behaviours, the leader's role in developing teamwork and team leadership, and the organisational context. It is important to understand that leadership does not occur in a vacuum. Each chapter includes illustrative real life examples, experiential exercises, short cases and/or assessments. The book appeals to undergraduate and graduate students in Africa and/or other parts of the world who are interested in leadership on the African continent. In addition, managers, trainers and practitioners can benefit from reading *Essentials of Leadership in Africa*.

Virtual Teams That Work Cristina B. Gibson, Susan G. Cohen, 2003-03-21 *Virtual Teams That Work* offers a much needed comprehensive guidebook for business leaders and managers who want to create the organizational conditions that will help virtual teams thrive. Each chapter in this important book focuses on best practices and includes case studies and illustrative examples from a wide variety of companies including British Petroleum, Lucent Technologies, Ramtech, SoftCo and Whirlpool Corporation. These real life examples demonstrate how the principles identified in the book play out within virtual teams. *Virtual Teams That Work* shows how organizations can put in place the structure to help team members who speak different languages and have different cultural values develop effective ways of communicating when there is little opportunity for the members to meet face to face. The authors also reveal how organizations can implement performance management and reward systems that will motivate team members to cooperate across multiple boundaries. And they offer the information to determine which technologies best fit a variety of virtual team tasks and the level of information technology support needed.
