Deep Learning for Social Media Data Analytics Tzung-Pei Hong,Leticia Serrano-Estrada,Akrati Saxena,Anupam Biswas,2022-09-18 This edited book covers ongoing research in both theory and practical applications of using deep learning for social media data Social networking platforms are overwhelmed by different contents and their huge amounts of data have enormous potential to influence business politics security planning and other social aspects Recently deep learning techniques have had many successful applications in the AI field The research presented in this book emerges from the conviction that there is still much progress to be made toward exploiting deep learning in the context of social media data analytics It includes fifteen chapters organized into four sections that report on original research in network structure analysis social media text analysis user behaviour analysis and social media security analysis This work could serve as a good reference for researchers as well as a compilation of innovative ideas and solutions for practitioners interested in applying deep learning techniques to social media data analytics

DIGITAL ENTREPRENEURSHIP Dr. Suvarna S, Mr. Suresh Chalavadi & Mrs. Lavanya N Gowda,2025-08-16 Digital

entrepreneurship is a modern approach to business that harnesses the power of digital technologies to create promote and manage ventures Unlike traditional entrepreneurship which often requires physical infrastructure and high startup capital digital entrepreneurship offers a more accessible flexible and scalable model Entrepreneurs can now launch online stores mobile apps content platforms or service based businesses with minimal investment thanks to tools like cloud computing social media digital payment systems and data analytics Digital entrepreneurship involves the identification and exploitation of digital opportunities to deliver innovative products services or business models primarily through digital platforms such as websites mobile applications social media and e commerce portals Unlike traditional entrepreneurship digital entrepreneurship leverages the internet cloud computing big data artificial intelligence and other emerging technologies to create scalable and flexible businesses Digital entrepreneurship is driven by the rapid evolution of information and communication technologies ICTs which have redefined how businesses operate interact with customers and compete in the global marketplace The digital environment offers lower entry barriers reduced operational costs global market access and real time customer engagement making it a fertile ground for start ups and innovators Entrepreneurs can now test ideas quickly adapt to market feedback in real time and reach a wide audience with minimal physical infrastructure

Conversational Artificial Intelligence Romil Rawat,Rajesh Kumar Chakrawarti,Sanjaya Kumar Sarangi,Anand Rajavat,Mary Sowjanya Alamanda,Kotagiri Srividya,K. Sakthidasan Sankaran,2024-03-06 This book reviews present state of the art research related to the security of cloud computing including developments in conversational AI applications It is particularly suited for those that bridge the academic world and industry allowing readers to understand the security concerns in advanced security solutions for conversational AI in the cloud platform domain by reviewing present and evolving security solutions their limitations and future research directions Conversational AI combines natural language processing NLP with traditional software like chatbots voice assistants or an interactive voice recognition system to help customers through either a spoken or typed interface Conversational chatbots that respond to questions promptly and accurately to help customers are a fascinating development since they make the customer service industry somewhat self sufficient A well automated chatbot can decimate staffing needs but creating one is a time consuming process Voice recognition technologies are becoming more critical as AI assistants like Alexa become more popular Chatbots in the corporate world have advanced technical connections with clients thanks to improvements in artificial intelligence However these chatbots increased access to sensitive information has raised serious security concerns Threats are one time events such as malware and DDOS Distributed Denial of Service assaults Targeted strikes on companies are familiar and frequently lock workers out User privacy violations are becoming more common emphasizing the dangers of employing chatbots Vulnerabilities are systemic problems that enable thieves to break in Vulnerabilities allow threats to enter the system hence they are inextricably linked Malicious chatbots are widely used to spam and advertise in chat rooms by imitating human behavior and discussions or to

trick individuals into disclosing personal information like bank account details *Fast Forward Investing: How to Profit from AI, Driverless Vehicles, Gene Editing, Robotics, and Other Technologies Reshaping Our Lives* Jon Markman, 2018-11-02
