Trends in Learning Research Samuel N. Hogan, 2006 Learning as used here refers to concerted activity that increases the capacity and willingness of individuals, groups, organisations, and communities to acquire and productively apply new knowledge and skills to grow and mature and to adapt successfully to changes and challenges. Such learning empowers individuals and organisations to make wise choices, solve problems, and break new ground. In particular, it is sustainable; it is a lifelong, renewable process for people and for the institutions that serve people. Learning certainly includes academic studies and occupational training through high school and beyond, but also encompasses the physical, cognitive, emotional, and social development of children in the earliest years of their lives. This book presents new research in this explosive field.

Weekly Edition*, 1912 **The Galaxy** William Conant Church, 1877 **Popular Mechanics Magazine**, 1928 **Student-centered Language Arts, K-12** James Moffett, Betty Jane Wagner, 1992 This is the fourth edition of James Moffett's seminal text first published in 1968, which set forth the rationale and practices for the kind of individualized, interactive, integrative language learning environment that only today is coming into its own. It proposed whole language, collaborative learning, active learning, writing workshops, the process approach, student empowerment, portfolio assessment, and the substitution of children's literature for basal readers many years before these cornerstones of enlightened English language arts teaching became fashionable. The book is the centerpiece of a life work devoted to curricular innovation and constitutes a truly original approach to the nature of discourse. It is cross-referenced to an equally original collection of anthologies that illustrate with both professional and student writing the reading, writing, talking, dramatizing repertoires it stakes out, and to Moffett's other works that build on and extend this one. From the second edition on, the book has profited from the input of Betty Jane Wagner, a master teacher of teachers. Student-centered
