Comics Art in Korea John A. Lent, 2025-01-15 In *Comics Art in Korea* comics scholar John A. Lent embarks on a comprehensive exploration of the vibrant world of Korean comics, cartoons, comic strips, graphic novels, webcomics, and animation. This meticulously researched work delves deep into the intricate history, cultural significance, and artistic innovations that have shaped the comics landscape in both North and South Korea. Drawing from extensive research, decades of interviews with comics creators and artists, and firsthand study, Lent offers readers a profound understanding of the societal, political, and cultural factors that have played a pivotal role in shaping Korean comics. Korean comics have a storied tradition that stretches back decades. In this insightful book, Lent not only traces the origins of Korean comics but also places them within the broader context of Asian comics, highlighting the interconnectedness of comic art across the continent. From the early days of Korean comics to their contemporary evolution, Lent unravels the forces that have influenced and shaped the industry and sheds light on the ways in which comics have been used as a medium for social commentary, political expression, and cultural identity in Korea. *Comics Art in Korea* is not merely a historical account but a celebration of the art form itself. Lavishly illustrated with examples of Korean comics, this book showcases the incredible talent and creativity of Korean comics artists. Lent's impeccable attention to detail and his ability to contextualize each work within its cultural and historical framework make this book an invaluable resource for both comics enthusiasts and scholars.

Research Skills for Journalists Vanessa Edwards, 2016-03-02 *Research Skills for Journalists* is a comprehensive, engaging, and highly practical guide to developing the varied skillset needed for producing well-researched, quality journalism across a range of platforms. Illustrated with original interviews and case studies, the book guides readers through a clear understanding of sources of news, as well as illustrating the skills needed to undertake successful digital and non-digital research and to conduct interviews for a variety of media. It examines the skills needed for basic data journalism and presents an in-depth exploration of the different research skills specific to producing print and online text, as well as those for broadcast and multimedia journalism. Key research skills explored in the book include: Developing digital research skills, including researching through search engines, messages boards, discussion groups, and web forums; social media apps and using user-generated content; Working with data, including sourcing, auditing, and analysing data; data visualisation and understanding the importance of accuracy and context; Essential non-digital research skills, including telephone technique, using libraries and working with librarians, understanding copyright, working with picture libraries, and research services; and producing freedom of information requests. Working directly with people to research stories, including the power of persuasion, tracking down great contributors, managing and protecting sources, planning and managing interviews, and interviewing vulnerable people. Researching for multimedia production of stories, including researching a radio story, podcast, or video story, and planning for outside broadcasts. *Research Skills for Journalists* also explores specialist research skills needed for working

overseas and investigates new areas which could be used for journalism research in the future The book is illustrated with original contributions by journalists from a variety of backgrounds including veteran investigative journalist John Pilger pioneering data journalist Simon Rogers and The Bureau of Investigative Journalism's award winning reporter Abigail Fielding Smith It is an invaluable guide for students and practitioners of journalism to the skills needed for finding and developing original news stories today

Redbrick William Hadden Whyte, 2015 In the last two centuries Britain has experienced a revolution in higher education with the number of students rising from a few hundred to several million Yet the institutions that drove and still drive this change have been all but ignored by historians Drawing on a decade s research and based on work in dozens of archives many of them used for the very first time this is the first full scale study of the civic universities new institutions in the nineteenth century reflecting the growth of major Victorian cities in Britain such as Liverpool Manchester Birmingham York and Durham for more than 50 years Tracing their story from the 1780s until the 2010s it is an ambitious attempt to write the Redbrick revolution back into history William Whyte argues that these institutions created a distinctive and influential conception of the university something that was embodied in their architecture and expressed in the lives of their students and staff It was this Redbrick model that would shape their successors founded in the twentieth century ensuring that the normal university experience in Britain is a Redbrick one Using a vast range of previously untapped sources Redbrick is not just a new history but a new sort of university history one that seeks to rescue the social and architectural aspects of education from the disregard of previous scholars and thus provide the richest possible account of university life It will be of interest to students and scholars of modern British history to anyone who has ever attended university and to all those who want to understand how our higher education system has developed and how it may evolve in the future
