,19?? Artificial Intelligence and SMEs in Developing Economies Timilehin Olasoji Olubiyi, Tulus T.H.

Tambunan, 2025-06-27 Artificial Intelligence and SMEs in Developing Economies explores the emergence and application of Artificial Intelligence in developing economies. This is in response to the shift in Artificial Intelligence research towards the achievement of Sustainable Development Goals (SDGs) as well as the environmental problems and methods to solve them. Written by experts from around the globe from developing countries, the book contains a balance of theoretical and empirical chapters that explore Artificial Intelligence in the context of business. It focuses especially on integrating industry 5.0 where Artificial Intelligence plays a major role. The chapters include knowledge and applications for small businesses ranging from disruptive Artificial Intelligence technologies to determinants of Artificial Intelligence adoption in SMEs from major developing economies such as Africa, Latin America, and Asia. In the latter chapters, the book discusses the application of Artificial Intelligence such as how to leverage it for sustainable and responsible small businesses and the importance of appreciating it in a business environment. This book is the first substantial study on Artificial Intelligence and the future of sustainable small businesses in emerging economies. It is a useful resource for academics and university students with interest in Artificial Intelligence and sustainable small businesses, specifically small business development. It is also a valuable read for policy makers and SME stakeholders.

**Career Services and Workforce Development Centers for Libraries** Raymond Pun, Arpine Eloyan, Michael R. Oppenheim, 2024-11-18. With the rise of unemployment, increased career growth opportunities, and changing workforce demographics, libraries can support job seekers in several ways. Career Services and Workforce Development Center for Libraries: A Guide serves as a resource for libraries interested in creating, supporting, or enhancing their career services, economic, and workforce development programs for their communities. Going beyond collection development and hosting job fair activities, the book covers teaching resources and interviews from library leaders supporting workforce development initiatives or collaborations. Ideas on how libraries can be embedded in the workforce development community by providing a series of job readiness activities, programs, and services are shown. Academic and public librarians can support their users exploring career opportunities and development. The book examines employment trends and resources such as generative artificial intelligence to dive into these issues so libraries can stay active in identifying new skill development and technologies to support their communities. How can one start a career services or job center program in their libraries? What are specialized career services in libraries being offered? How can libraries advocate for funding for workforce development? Divided into five chapters, each chapter addresses these questions and provides a series of examples, ideas, and resources for readers to consider replicating in their own libraries.
