From Amazon shopping recommendations, Facebook image recognition, and personal assistants like Siri, Cortana, and Alexa, your phone is becoming a portal to real-world applications of artificial intelligence. This book is a glimpse into the future that illustrates how AI will continue to transform our daily lives in the near future. Digitalisation and the new technological possibilities that artificial intelligence AI brings are driving the biggest social and economic changes since the industrial revolution. The sooner we begin to contemplate what those might be, the better equipped we will be to mitigate and manage the dangers. Thus, it is a request to our esteemed readers to send the feedback and suggestions etc. for the improvement of the book. All your requests are welcome.

Everyday Automation Sarah Pink, Martin Berg, Deborah Lupton, Minna Ruckenstein, 2022-05-09. This Open Access book brings the experiences of automation as part of quotidian life into focus. It asks how, where, and when automated technologies and systems are emerging in everyday life across different global regions. What are their likely impacts in the present and future? How do engineers, policy makers, industry stakeholders, and designers envisage artificial intelligence AI and automated decision making ADM as solutions to individual and societal problems? How do these future visions compare with the everyday realities, power relations, and social inequalities in which AI and ADM are experienced? What do people know about automation, and what are their experiences of engaging with actually existing AI and ADM technologies? An international team of leading scholars bring together research developed across anthropology, sociology, media, and communication studies, and ethnology, which shows how, by rehumanising automation, we can gain deeper understandings of its societal impacts.
