Designing Instruction with Generative AI Brent A. Anders, 2025-09-16 Designing Instruction with Generative AI offers a novel set of tools and strategies for leveraging generative AI to create engaging and personalized learning experiences. While instructional designers are a tremendous asset to higher education, not all colleges or universities have the robust staff needed to support all instructors on staff or large student populations. Drawing on a wealth of research, professional experience, and strategic insights, this book equips new and seasoned teaching faculty and trainers with step-by-step directions on how freely accessible artificial intelligence software can assist with all aspects of the course creation and instruction process and cater to the needs of diverse learners. Each chapter offers forward thinking and empirically validated ways to help faculty create and improve instructional materials, course design, and learning environments while supporting their digital literacies. Rather than introduce AI as a means of outsourcing subject area expertise, critical thinking, or cognitive processes, the author instead emphasizes its potential to build on traditionally honed knowledge and foundational instructional design practices. From optimizing course alignment and accessibility practices to fostering active learning, motivation, and engagement, educators will find new solutions to common teaching and learning challenges with greater efficiency in time and capacity. The Open Access version of this book is available at <http://www.taylorfrancis.com> and has been made available under a Creative Commons Attribution Non-Commercial No Derivatives CC BY-NC-ND 4.0 license. **Co-Teaching**

Evolved Matthew Rhoads, Belinda Dunnick Karge, 2024-10-01 With technology and artificial intelligence playing a growing role in education, traditional co-teaching strategies require an update. The authors offer a revived approach to co-teaching that accounts for pressing topics in today's classroom. PreK-12 teachers will learn to create collaborative co-teaching partnerships and navigate key co-teaching components such as lesson design, conflict resolution, and communication with stakeholders with research-backed tools and strategies. PreK-12 teachers as well as school and district leaders can use this book to incorporate digital technology tools such as ed tech and artificial intelligence into lessons. Plan and design co-taught lessons based on research-backed instructional strategies. Understand how to involve specialists in co-teaching planning and decisions. Learn and adopt the mindset and communication skills behind thriving co-teaching partnerships. Establish and cultivate a culture of collaboration with co-teachers and stakeholders.
