combination of conventional breeding techniques with genomic tools and approaches leading to a new genomics based plant breeding technology supporting crop plants that respond better to biotic and abiotic stress and pathogen attacks Plant genomics play an important role in developing more efficient plant cultivars which are essential for the neo green revolution needed to feed the world s rapidly growing population Plant genomic data is being utilized in genetic engineering to ensure that better and resilient varieties of crops are available ensuring food security This book is of immense interest to teachers researchers crop scientists capacity builders and policy makers Also the book serves as additional reading material for undergraduate and graduate students of agriculture biotechnology genomics soil science and environmental sciences National and International agricultural scientists and policy makers will also find this to be a useful read Charged Particles in Oncology Marco Durante, Francis A. Cucinotta, Jay S. Loeffler, 2018-01-31 High energy charged particles represent a cutting edge technique in radiation oncology Protons and carbon ions are used in several centers all over the world for the treatment of different solid tumors Typical indications are ocular malignancies tumors of the base of the skull hepatocellular carcinomas and various sarcomas The physical characteristics of the charged particles Bragg peak allow sparing of much more normal tissues than it is possible using conventional X rays and for this reason all pediatric tumors are considered eligible for protontherapy Ions heavier than protons also display special radiobiological characteristics which make them effective against radioresistant and hypoxic tumors On the other hand protons and ions with high charge Z and energy HZE particles represent a major risk for human space exploration The main late effect of radiation exposure is cancer induction and at the moment the dose limits for astronauts are based on cancer mortality risk The Mars Science Laboratory MSL measured the dose on the route to Mars and on the planet s surface suggesting that a human exploration missions will exceed the radiation risk limits Notwithstanding many studies on carcinogenesis induced by protons and heavy ions the risk uncertainty remains very high In this research topic we aim at gathering the experiences and opinions of scientists dealing with high energy charged particles either for cancer treatment or for space radiation protection Clinical results with protons and heavy ions as well as research in medical physics and pre clinical radiobiology are reported In addition ground based and spaceflight studies on the effects of space radiation are included in this book Particularly relevant for space studies are the clinical results on normal tissue complications and second cancers The eBook nicely demonstrates that particle therapy in oncology and protection of astronauts from space radiation share many common topics and can learn from each other
