Artificial Intelligence and the Perspective of Autonomous Surgery Konrad Karcz,Zbigniew Nawrat,Andrew A. Gumbs,2024-12-23 This book has two heroes the surgeon and the robot The education system and intelligence can create a human who is specialized in surgery While the accurate analysis of data with machine learning AI can create a more autonomous robot for surgery Currently robots still require human input in the decision making loop whether or not this will always be the case is an issue that still needs to be debated analyzed and studied preferably by computer scientists AND surgeons Surgeons and their patients are increasingly opting for less invasive surgeries However among their many advantages there is an important issue less invasiveness always means limited access to direct information from the operating field 3D image local palpation sensations all information about the whole patient and feedback from the accompanying team during teleoperation To increase precision we are increasingly using surgical robots and mechatronic instruments The less invasive the surgery and the greater the precision of robotic micro instruments the greater the role of artificial intelligence methods especially machine learning which supports the surgeon in making decisions planning and performing the procedure The development of artificial intelligence and further evidence of its effectiveness in various application fields mean that the work of a doctor is changing today In the book we address the issue of AI surgery asking whether this means that an AI surgeon will be created A key question about autonomous surgical robots will come up regularly how far can we go with their autonomy while maintaining safe and effective procedures The book provides useful information on both early successes failures and expectations related to the development of new technologies in surgery It is a guide written by various experts intended for a wide audience from medical development planners through students to doctors and decision makers

The Power of Ideas Zhiyi Liu,2022-12-08 As the first academic monograph that a Chinese scholar discusses the histories of thoughts and ideas related to the development of digital economics this book aims to make research from the perspective of the history of ideas and discuss the ideas influencing the development of digital economics and the evolution of related theories and thoughts with the methodology of interdisciplinary research The human society is in the stage of major historic transition and enters the digital world with the main goal of developing the artificial world In this world the development of digital economics is significantly characterized by the deep interaction between the real and the virtual worlds while the key triggering this paradigm reform is the evolution of ideas since the modern times While involving the field of computer these thoughts are also related to the fields of philosophy ethics communication and economics Therefore the results of the research on the history of ideas related to digital economics are required to really understand the depth of this discipline If computationalism is the most important paradigm evolution of natural science the most important paradigm evolution of social science is interdisciplinary complex science In the meantime this book is the most significant in understanding the nature of paradigm evolution related to the development of digital

economics from the perspective of complex science and interdisciplinary systematic researches Digital economics is in the foundation laying phase while this book mainly aims to historically narrate the thoughts of this discipline and hopes that readers can understand the influence of ideas in the old era on shaping the disciplines in the new era while exploring this new discipline The construction of digital economics is a process of evolution This book will be helpful to understand the underlying logic of the ideas constructed by the thinkers in different fields AI Magazine ,1989 **A Human Algorithm** Flynn Coleman,2019-10-01 A groundbreaking narrative on the urgency of ethically designed AI and a guidebook to reimagining life in the era of intelligent technology The Age of Intelligent Machines is upon us and we are at a reflection point The proliferation of fast moving technologies including forms of artificial intelligence akin to a new species will cause us to confront profound questions about ourselves The era of human intellectual superiority is ending and we need to plan for this monumental shift A Human Algorithm How Artificial Intelligence Is Redefining Who We Are examines the immense impact intelligent technology will have on humanity These machines while challenging our personal beliefs and our socioeconomic world order also have the potential to transform our health and well being alleviate poverty and suffering and reveal the mysteries of intelligence and consciousness International human rights attorney Flynn Coleman deftly argues that it is critical that we instill values ethics and morals into our robots algorithms and other forms of AI Equally important we need to develop and implement laws policies and oversight mechanisms to protect us from tech s insidious threats To realize AI s transcendent potential Coleman advocates for inviting a diverse group of voices to participate in designing our intelligent machines and using our moral imagination to ensure that human rights empathy and equity are core principles of emerging technologies Ultimately A Human Algorithm is a clarion call for building a more humane future and moving conscientiously into a new frontier of our own design Coleman argues that the algorithms of machine learning if they are instilled with human ethics and values could bring about a new era of enlightenment San Francisco Chronicle 1983 *Proceedings of the International Conference on Systems, Man and Cybernetics, December 29, 1983-January 7, 1984, Bombay and New Delhi, India* IEEE Systems, Man, and Cybernetics Society,1983 *AI Expert* ,1987 **PC AI.** ,2001 Proceedings of the International Conference on Systems, Man and Cybernetics ,1983 *Annual Workshop on Space Operations Automation and Robotics (SOAR ...)* ,1987 First Annual Workshop on Space Operations Automation and Robotics (SOAR 87) ,1987 **Journal of New Generation Computer Systems** ,1989 Paper ,1988 Office Automation and Information Systems Arnold Rosen,1987
