Chaos Theology A Revised Creation Theology:

Chaos Theology Sjoerd Lieuwe Bonting, 2002 Explores an alternative to the idea that God created the universe out of nothing at all and looks at the implications of God's creation out of chaos when the earth was without form and void But some of that original chaos remains with consequences for both morals and health Creation and Double Chaos Sjoerd Lieuwe Bonting, 2004-12-01 Scientist and theologian Sjoerd Bonting offers a new overarching framework for thinking about issues in religion and science He looks at the creation controversy itself including biblical perspectives traditional doctrines and the particular potential contribution of chaos theory Finally Bonting extends this perspective a combination of chaos theory and chaos theology he calls double chaos into a framework that addresses traditional questions about evil divine agency soteriology the understanding of disease possible extraterrestrial life and the future **Christian Life and Practice** Owen C. Thomas, 2009-01-01 This book is a study of the Christian life and the practice of Christians and the church from an Anglican perspective It begins with an analysis and explication of the structure and process of the Christian life before God in the church and the world involving a five fold rule of life and the relation of this to spiritual direction This is followed by an analysis and critique of the current spirituality movement which arose in the 1970s and which has come to dominate and mislead the churches A sequel to the latter explains the origin of the spirituality movement in the current Romantic movement that arose in the 1960s and has influenced all aspects of our culture with ambiguous results Next there is a critique of contemporary parish ministry as practiced in residential parishes that at best ministers only to the private lives of its members followed by a fictional story of such a residential parish that suggests a new departure in parish ministry Then there is a critique of preaching in the Episcopal Church that is generally considered to be poor and a proposal of a way to overcome this The concluding three chapters treat a fundamental problem in our approach to private prayer and a way to resolve this a proposal for a way to overcome the current impasse in the Anglican Communion concerning homosexuality and a meditation on the responsibility of Christians in public life The Work of the Spirit Michael Welker, 2006 This book is the result of a consultation entitled Pneumatology exploring the work of the Spirit from contemporary perspectives held in New York City in November 2004 Acknowledgments **The Subjective Eye** Richard Valantasis, Deborah J. Haynes, James D. Smith, Janet F. Carlson, 2006-05-15 One of the great joys of the academic life is to pay homage in a Festschrift to a scholar who has influenced both colleagues and students over years of interaction and friendship both professional and personal This volume honors a scholar and theologian of historical theology a theorist and a practitioner of religion and the arts and a keen analyst of cultural trends both ancient and modern Margaret R Miles's prodigious production as a scholar has legendary qualities Her dozen plus books alone explore history patristics ancient philosophy art and art history spiritual formation and religious practice critical theory film ethics and values personal growth gender and women's studies as well as her true academic loves Augustine and Plotinus The breadth and depth of her own work and her influence upon others demands an

expansive volume which the editors of this Festschrift unfortunately had to restrict to four categories Historical Theology Religion and Culture Religion and Gender and Religion and the Visual Arts in order to capture the heart of our appreciation for her from the Introduction

Congress Volume Aberdeen 2019 ,2022-06-08 This volume presents the main lectures of the 23rd Congress of the International Organization for the Study of the Old Testament IOSOT held in Aberdeen United Kingdom in August 2019 Twenty internationally distinguished scholars present their current research on the Hebrew Bible including the literary history of the Hebrew text its Greek translation and the history of interpretation Some focus on the semantic and syntactic features of the biblical text and its impact on cultural memory while others deal with textual witnesses in the Dead Sea scrolls Ethiopic sources and Arabic translations The volume gives readers a representative view of recent research on the Hebrew Bible

The Cosmic Breath Amos Yong,2012-05-10 The interjection of pneumatology in both theologies of interreligious dialogue and in the theology and science conversation comes together in this volume The resulting Christianity Buddhism science dialogue opens up to new pneumatological perspectives on philosophical cosmology and anthropology in interdisciplinary and global context

Defining Love Thomas Jay Oord,2010-06-01 Some scientific studies suggest that human beings are innately selfish and that Christian virtues like self sacrifice are a delusion In this intriguing volume esteemed theologian Thomas Jay Oord interprets the scientific research and responds from a theological and philosophical standpoint providing a state of the art overview of love and altruism studies He offers a definition of love that is scientifically theologically and philosophically adequate As Oord helps readers arrive at a clearer understanding of the definition recipients and forms of love he mounts a case for Christian agape and ultimately for a loving God

Creation and the Abrahamic Faiths Neil Spurway,2008 Creation How we are here Not just us of course but bluetits and Hereford cattle and cabbages and E coli and deserts and mountains and suns and nebulae in fact all that is So not only oeWhy are we here but oeWhy is there a here TM for us to inhabit That is this book TM s theme Inevitably it doesn TM t answer the question in a mechanistic sense A telescope cannot look at itself and neither can an inhabitant of the Universe say how it came to be But that does not stop those questions haunting us So where shall we turn To cosmology The concept of an initial event a oeBig Bang is now almost universally accepted But what caused that Most would feel that this is not a question science can answer The first two contributors to this book are professional cosmologists yet cosmology is only a background for this book not its core theme That theme is the conviction that the Universe owes its existence to a divine Creator and the specific formulations of this conviction in the three great monotheistic religions the oeAbrahamic faiths The scriptures of all three faiths include the creation accounts in the first two chapters of Genesis Later developments moved the expressions of the three faiths considerably apart but the social and political conditions of the 21st C world make it imperative that every effort should be put into a recovery of understanding between their practitioners The purpose of this book is to contribute to that understanding Of thirteen chapters two are by Jewish authors and three by Moslems several of the Christian authors also are

deeply versed in the other traditions Together the chapters show that the attitudes of the three faiths to Creation have far more in common than otherwise In particular they are noticeably and encouragingly coming together in their endorsements of 21st C concerns for the environment The book derives from a conference of the Science and Religion Forum in Sept 2006 but all chapters have been rewritten for publication and carefully edited with linking commentaries **The Ethics of**

Nature Celia Deane-Drummond,2008-04-15 This accessible and timely book uses a Christian perspective to explore ethical debates about nature A detailed exploration of humanity s treatment of the natural world from a Christian perspective Covers a range of ethical debates including current controversies about the environment animal rights biotechnology consciousness and cloning Sets the immediate issues in the context of underlying theological and philosophical assumptions Complex scientific issues are explained in clear student friendly language The author develops her own distinctive ethical approach centred on the practice of wisdom Discusses key figures in the field including Peter Singer Aldo Leopold Tom Regan Andrew Linzey James Lovelock Anne Primavesi Rosemary Radford Ruether and Michael Northcott The author has held academic posts in both theology and plant science The Many Facets of Love Thomas Jay Oord,2007 Poets theologians romantics scientists and revolutionaries alike have explored the many facets of love Judging by the wide use of the word oelove and the high praise it typically receives we might think that philosophers have thoroughly analyzed love But this is not the case This book takes a step toward rectifying the neglect of a philosophical analysis of love It brings together fifteen philosophical perspectives that explore some of love TM s most important facets Most of the essays have theistic or religious concerns in mind Zygon ,2008 Romanian Astronomical Journal ,2001 Dictionary of International Biography ,2007 A biographical record of contemporary achievement together with a key to the location of the original biographical notes

The Bible and Popular Theology ... Third Edition, Revised and Augmented George Vance SMITH,1871

Perspectives on Science and Christian Faith ,2002 *Economic Computation and Economic Cybernetics Studies and Research* ,1999 Noesis ,2008 **Religious Humanism** ,2003 Religion and the Environment: Connections: science, ethics, eco-feminism, consumerism, sustainability and spirituality Roger S. Gottlieb,2010 In the last two decades a new form of religiously motivated social action and a virtually new field of academic study each based in recognition of the connections between religion and humanity s treatment of the environment have developed Interactions between religion and environmental concern have been manifest in the explosive growth of ecotheological writings institutional commitment by organized religions and environmental activism explicitly oriented to religious ideals Clergy throughout the world in virtually every denomination have received word from leaders of their religion that the environment no less than sexuality poverty or war and peace is now a basic and compelling religious matter Out of this confrontation have been born vital new theologies based in the recovery of marginalized elements of tradition profound criticisms of the past and ecologically oriented visions of God the Sacred the Earth and human beings Theologians from every religious tradition along with dozens of non

denominational spiritual writers have confronted world religions past attitudes towards nature In the realm of institutional commitment public statements and actions by organized religions have grown dramatically In the context of political action throughout the U S and the world religiously oriented groups take part in environmentally oriented political action from lobbying and consciousness raising to activist demonstrations and civil disobedience This collection serves as a comprehensive introduction overview and in depth account of these exciting new developments The four volumes cover virtually every aspect of the field from theological change and institutional commitment to innovation in liturgy from new ecumenical connections among different religions and between religion science and environmental movements from religious participation in environmental politics to an account of the global social and political contexts in which religious environmentalism has unfolded
