Policy Games for Strategic Management Richard D. Duke, Jac Geurts, 2004 This book explains why and how gaming stimulation techniques have been used in Europe and the United States to improve decision quality on a special class of bewildering and threatening strategic problems that are described as strategic volcanoes or macr

Venture ,1989 *Your Life, Less Complicated* Preeti, Your Life Less Complicated helps you declutter decisions commitments relationships and routines It s not about doing less for the sake of minimalism it s about simplifying to uncover what truly matters Through boundary work clarity exercises and a focus on ease this book teaches how to eliminate the unnecessary and live with more grace joy and space

Sense-making Methodology Reader Lois Foreman-Wernet, 2003 Dervin s Sense making Methodology is widely used for studying users audiences patrons patients and clients in a variety of fields including communication cultural studies library and information science nursing environmental studies arts policy and education public health marketing public opinion public relations sociology and psychology this reader compiles in one volume the currently widely dispersed writing which provide an overview of the approach s meta theoretical

methodological and method foundations Dervin has called her approach a methodology between the cracks focused on studying and implementing communication communicatively in any setting

Radical Ecology in the Face of the Anthropocene Extinction John A. Smith, Anna Wilson, 2024-06-14 This book has two interlocking ambitions The first is to steer what we purposefully call the idioms of critical philosophy towards a more ecologically informed paradigm The second is to recognise that what has rightly come to be called The Anthropocene extinction is not and cannot be treated as simply a scientific fact but rather a socio political and ecological dispute of immense complexity We start with an exploration of the consequences of a critical tradition which under the name Enlightenment has placed humanity at its centre and chance as its most general and problematic characteristic We argue that this leads to a schizophrenic relationship between radical critique and science which can be avoided if we take the implications of biosemiotics seriously and develop a new ecologically informed social science We argue that in practice this means that for science to be practical in addressing the Anthropocene extinction we have to recognise that it operates in a historically emergent highly differentiated technopolitical ecology Science as it is currently commonly understood and used is not ecological enough This book will interest social scientists interested in not only describing and critiquing but also understanding and responding to the complex problems facing humanity scientists wanting to make sense of social phenomena those educating the next generation of social scientists and climate activists and policy makers

Intelligent Governance Gilles Paquet, Christopher Wilson, 2016-06-12 Striking the right fit between resources processes and outcomes in complex environments where different groups have something to contribute towards joint outcomes even though they partake in joint operations in the pursuit of their own objectives This is what intelligent governance is all about It is the practical application of an evolving worldview that is a less conflictive more intelligent more cooperative and a wiser mode of human coordination This short book proposes some guideposts for intelligent governance It does not put forward a rigid blueprint or a recipe that could mechanically and blindly be followed but a prototype for a process of inquiry seeking to help organizations find a way forward through innovation and value adding some general indications about the most toxic pitfalls likely to materialize mental prisons lack of mindfulness etc and comments about the most promising opportunities or initiatives likely to nudge the coordinating inquiries into successful directions

Serious Play Monica Obniski, Darrin Alfred, 2018-01-01 A lively exploration of eclecticism playfulness and whimsy in American postwar design including architecture graphic design and product design This spirited volume shows how postwar designers embraced whimsy and eclecticism in their work exploring playfulness as an essential construct of modernity Following World War II Americans began accumulating more and more goods spurring a transformation in the field of interior decoration Storage walls became ubiquitous often serving as a home's centerpiece Designers such as Alexander Girard encouraged homeowners to populate their new shelving units with folk art as well as unconventional and modern objects to produce innovative and unexpected juxtapositions within modern architectural settings Playfulness can be

seen in the colorful child sized furniture by Charles and Ray Eames who also produced toys And in the postwar corporate world the concept of play is manifested in the influential advertising work of Paul Rand Set against the backdrop of a society that was experiencing rapid change and high anxiety Serious Play takes a revelatory look at how many of the country s leading designers connected with their audience through wit and imagination Japan Weekly Mail ,1896 **The Index ...**
