Bond, Lola Canamero, Bruce Edmonds, 2006-04-11 Socially situated planning provides one mechanism for improving the social awareness of agents Obviously this work is in the preliminary stages and many of the limitations and the relationship to other work could not be addressed in such a short chapter The chief limitation of course is the strong commitment to defining social reasoning solely at the meta level which restricts the subtlety of social behavior Nonetheless our experience in some real world military simulation applications suggest that the approach even in its preliminary state is adequate to model some social interactions and certainly extends the state of the art found in traditional training simulation systems Acknowledgments This research was funded by the Army Research Institute under contract TAPC ARI BR
