Charles Darwin Biography:

The Autobiography of Charles Darwin Charles Darwin, 2022-05-28 In The Autobiography of Charles Darwin readers are provided with a profound insight into the life and thoughts of one of science's most pivotal figures. Written with remarkable clarity and introspective depth, this work illuminates Darwin's formative experiences, his scientific inquiries, and the evolving context of the Victorian era which both informed and challenged his groundbreaking theories. The narrative interweaves personal anecdotes with broader reflections on science, religion, and society, establishing a unique literary style that combines autobiography with philosophical inquiry, making it a vital resource for understanding the intellectual landscape of the 19th century. Charles Darwin (1809-1882) was a naturalist and geologist renowned for his groundbreaking work on the theory of evolution through natural selection. Influenced by a diverse family background and extensive voyages, particularly the HMS Beagle expedition, his reflections reveal not only the scientific rigor behind his cogent theories but also the personal struggles he faced as he contended with the theological implications of his findings. This blend of rigorous scholarship and personal narrative enriches our understanding of Darwin as both a scientist and a man. I recommend The Autobiography of Charles Darwin to anyone interested in the complexities of scientific thought and the nature of personal conviction. This work offers a rare glimpse into the mind of a visionary thinker, making it essential reading for historians, scientists, and anyone curious about the origins of modern biology.

The Autobiography of Charles Darwin Charles Darwin, 2020-03-03 This edition of Darwin's life story restores previously censored passages on religion and the scientist's opinions of his contemporaries. Darwin wrote his autobiography in 1876 at the age of sixty-seven, hoping it would prove interesting to his children and grandchildren. Preparing the book for a wider audience, his family initially sought to protect his legacy by removing passages they found too personal or controversial. This restored edition, which appeared one hundred years after the publication of *On the Origin of Species*, was edited by Darwin's own granddaughter, Nora Barlow, who wished to share the text as it originally existed in her family's archives. Shedding light on the women in Darwin's life and his evolving views on religion, *The Autobiography of Charles Darwin* delves deep into his brilliant yet shy and reclusive personality, from his childhood love of nature to the reception of his groundbreaking theories on evolution. It also includes previously unpublished notes and letters on family matters as well as Darwin's dispute with Samuel Butler.

Charles Darwin: His Life in an Autobiographical Chapter (annotated) Charles Darwin, 2015-11-26 Charles Robert Darwin was the second son of Dr Robert Waring Darwin of Shrewsbury, where he was born on February 12, 1809. Dr Darwin was a son of Erasmus Darwin, sometimes described as a poet but more deservedly known as a physician and naturalist. Charles Darwin's mother was Susannah, daughter of Josiah Wedgwood, the well-known potter of Etruria in Staffordshire.

The Autobiography of Charles Darwin ***The Autobiography of Charles Darwin (Dodo Press)***

Charles Darwin, 2007-08 Charles Robert Darwin 1809 1882 was an English naturalist who achieved lasting fame by producing considerable evidence that species originated through evolutionary change at the same time proposing the scientific theory that natural selection is the mechanism by which such change occurs This theory is now considered a cornerstone of biology and has significantly affected other disciplines such as philosophy psychology and anthropology

Autobiography of Charles Darwin Charles Darwin, 2016-10-19 Charles Robert Darwin 12 February 1809 19 April 1882 was an English naturalist and geologist best known for his contributions to the science of evolution He established that all species of life have descended over time from common ancestors and in a joint publication with Alfred Russel Wallace introduced his scientific theory that this branching pattern of evolution resulted from a process that he called natural selection in which the struggle for existence has a similar effect to the artificial selection involved in selective breeding

The Autobiography of Charles Darwin Charles Darwin, 2016-10-22 Therefore my success as a man of science whatever this may have amounted to has been determined as far as I can judge by complex and diversified mental qualities and conditions Of these the most important have been the love of science unbounded patience in long reflecting over any subject industry in observing and collecting facts and a fair share of invention as well as of common sense With such moderate abilities as I possess it is truly surprising that I should have influenced to a considerable extent the belief of scientific men on some important points *Charles Darwin's 'The Life of Erasmus Darwin'* Charles Darwin, 2003

Charles Darwin's book about his grandfather The Life of Erasmus Darwin is curiously fascinating Before publication in 1879 it was shortened by 16% with several of the cuts directed at its most provocative parts The cutter with Charles's permission was his daughter Henrietta an example of the strong hidden hand of meek seeming Victorian women Originally published in 2003 this first unabridged edition edited by Desmond King Hele includes all that Charles originally intended the cuts being restored and printed in italics Erasmus Darwin was one of the leading intellectuals of the eighteenth century He was a respected physician a well known poet a keen mechanical inventor and a founding member of the influential Lunar Society He also possessed an amazing insight into the many branches of physical and biological science Most notably he adopted what we now call biological evolution as his theory of life 65 years prior to Charles Darwin's Origin of Species *The Life and Letters of*
