Charles Simonds:

Charles Simonds Charles Simonds, 1981 **Charles Simonds** Charles Simonds, 1981 This book which accompanies the exhibition is an effort to begin to assemble the photographs and texts which will make it somewhat easier for future authors to deal with the diversity of Simonds's work most of which has not even been photographed or otherwise documented There are also various kinds of private works which he makes for himself and friends which have not been considered here The photographs are arranged according to Simonds's categories and the section headings are based upon his written descriptions The categories are not mutually exclusive it would have been equally possible to group certain projects together as Cosmological and Organic Architectures an option which the artist may exercise in the future The three essays reflect the variety of responses that Simonds's Little People have elicited over the last decade Simonds's work first appeared in the charged politicized context of the early 1970s which often focused upon the implications of his street works with regard to the conventions of the New York art world Subsequent critiques questioned the apparent contradictions of his also making unique salable works John Beardsley's essays focuses on the question of the public works while Daniel Abadie's evokes the myriad associations of fantasy and reality that we encounter through the range of Simonds's activities as an artist The third essay alternates between a reading of the sculptures as objects and an introduction to some of the diverse ideas which contribute to their meaning the notes can be read separately as suggestions for further exploration The Commentaries are a personal tour of Circles and Towers Growing again concentrating on the presence of the sculptures themselves in the exhibition Reprinted in its entirety is Simonds's text Three Peoples which relates the histories and beliefs of the Little People

the built the archaeological and the urban Simonds shared friendship and ideas with Gordon Matta Clark and Robert Smithson Like Lucy Lippard with whom he lived during that decade Simonds believed in combining art and activism always preferring what he called the real world to the art world Yet despite taking part in many of the seminal exhibitions and art events of 1970s New York Simonds has left few traces on art history In order to explain Simonds s absence while simultaneously arguing for his central place within it Jules Pelta Feldman reconsiders the decade s self conception finding that Simonds exemplifies much of what has been ignored in 1970s art and much of what establishes it as a unique period of experimentation and possibility
