Macinnes, 1991 What were the issues that precipitated the termination of Charles I's rule in Scotland Was religion or nationalism the key catalyst This volume provides a detailed reconstruction of mainstream political developments between 1625 and 1641 along with an analysis of the rule of the king

A Focus on two Portraits of Anthony van Dyck Cristina Flores, 2014-03-21 Seminar paper from the year 2011 in the subject English Language and Literature Studies Culture and Applied Geography grade 1.3 University of Paderborn language English abstract In this essay I will focus on two single portraits of the Flemish painter and portraitist Anthony van Dyck 1599-1641 The first one portrays Thomas Wentworth 1st Earl of Strafford 1632 and the second one Lady Anne Carr Countess of Bedford 1638 Both paintings were painted during the 1630s the Caroline era in Britain Charles I became the king of England in 1625 and one can say that the first fifteen years of reign were remarkably peaceful even if he reigned without a parliament and only with the help of some confidants inter alia Thomas Wentworth 1st Earl of Strafford There were only conflicts in religious matters as Charles I married a catholic woman in Protestant England which caused the first strained relations between the two religious groups Additionally the Bishop of London wanted to abolish the Presbyterian Church constitution in Scotland and insert the Anglican Church instead This led to the Scots protest and invasion of England Finally all these factors unleashed an uprising and the Civil War in the 1640s Another interesting fact is that the Court of Charles I has been called the last Renaissance Court in England which was extremely formal imbued with an atmosphere of elegance and high morality Additionally there was the idea of Platonic Love at Court which came from Italy Its main notion was the transference of the Platonic pattern of divine love to a chosen lady who was then to be worshipped as the embodiment of highest perfection To show all the aims and meanings of van Dyck's portraits I chose a portrait of a man and one of a woman In both cases I will start by noting my first impressions and then in a second step analyse the portrait following a precise scheme There will be an analysis of the formal aspect and afterwards of the costume the body and the props used At the end there will be a conclusion summarising the most crucial features of van Dyck's courtly portraits **God's Fury, England's Fire**

Michael J. Braddick, 2008 The sequence of civil wars that ripped England apart in the 17th century was the single most traumatic event between the medieval Black Death and the two world wars Braddick gives the reader a sense both of what it was like to live through events of uncontrollable violence and what really animated the different sides **The Tablet**, 1904

**Personal Reminiscences** Ellis Cornelia Knight, Thomas Raikes, 1876 The Scottish Parliament, 1639-1661 John R. Young, 1996 This is a completely new analysis of the Scottish Parliament and is the first systematic study of the subject for seventy years Extensive use has been made of original manuscripts pamphlets and printed books of the period **Kings on Horseback** Peter Hammond Schwartz, 1984 *The Politics of the Ancient Constitution* Glenn Burgess, 1992 Examining the political ideas of common lawyers in early Stuart England and including surveys of the ideas of Sir Edward Coke and John Selden the book interprets the lawyer's theory of ancient constitution and on this basis it provides an interpretation of the

basic structure of thought and ideology in pre Civil War England In this way the book is able to make a contribution to debates over the ideological origins of the English Revolution      *Report of Proceedings* Scottish Society of the History of Medicine, 1992
