*The Politics of Dialogue* Ranabir Samaddar, 2017-07-05 Offering a detailed analysis of post colonial South Asia The Politics of Dialogue discusses the creation and impact of borders and the pervasive tension between the new nations Neither all out war nor complete peace this fragile condition makes political leaders and strategists feel claustrophobic a war produces an end result but peace allows the rulers to carry out their policies for governing along their

preferred path of development The book shows how cartographic communal and political lines are not only dividing countries but that they are being replicated within countries creating new visible and invisible internal frontiers It argues that in a situation where geopolitics constrains democracy the political class becomes incapable of coping with the tension between the inside outside eg democracy appears as an internal problem and geopolitics appears as a problem related to the outside

Words, Objects and Events in Economics Peter Róna,László Zsolnai,Agnieszka Wincewicz-Price,2020-09-03 This open access book examines from a variety of perspectives the disappearance of moral content and ethical judgment from the models employed in the formulation of modern economic theory and some of the papers contain important proposals about how moral judgment could be reintroduced in economic theory The chapters collected in this volume result from the favorable reception of the first volume of the Virtues in Economics series and represent further contributions to the themes set out in that volume i examining the philosophical and methodological fallacies of this turn in modern economic theory that the removal of the moral motivation of economic agents from modern economic theory has entailed and ii proposing a return descriptive economics as the means with which the moral content of economic life could be restored in economic theory This book is of interest to researchers and students of the methodology of economics ethics philosophers concerned with agency and economists who build economic models that rest in the intention of the agent *Economics as a Moral Science* Peter Rona,Laszlo Zsolnai,2017-04-13 The book is reclaiming economics as a moral science It argues that ethics is a relevant and inseparable aspect of all levels of economic activity from individual and organizational to societal and global Taking ethical considerations into account is needed in explaining and predicting the behavior of economic agents as well as in evaluating and designing economic policies and mechanisms The unique feature of the book is that it not only analyzes ethics and economics on an abstract level but puts behavioral institutional and systemic issues together for a robust and human view of economic functioning It sees economic facts as interwoven with human intentionality and ethical content a domain where utility calculations and moral considerations co determine the behavior of economic agents and the outcomes of their activities The book employs the personalist approach that sees human persons endowed with free will and conscience as the basic agents of economic life and defines human flourishing as the final end of economic activities The book demonstrates that economics can gain a lot in meaning and also in analytical power by reuniting itself with ethics Servant Leadership, Social Entrepreneurship and the Will to Serve Luk Bouckaert,Steven C. van den Heuvel,2019-11-28 This book brings together a number of important essays on the intersection of servant leadership and social entrepreneurship examining them through a shared focus on the will to serve This combination bears out the insight that inspiring social and economic leaders are able to transform a conflictual human settlement into a collaborative and caring human community The book seeks to answer the question of whether we can induce from their way of doing things a model of civic entrepreneurship and leadership that can inspire people in profit non profit and public organizations It also examines the extent to which the will to serve is compatible

with the will to maximize profit or the will to gain economic political or religious power Furthermore it asks how far different spiritual traditions create different models and examples of servant leadership and social entrepreneurship This book will be of interest to researchers working in the fields of business ethics business spirituality and corporate social responsibility
