Identification and Characterization of Molecular Targets in Hepatocellular Carcinoma Vinay Kumar,Surendra Kumar Shukla,2023-07-21 the field of oncology and is the most common form of liver cancer In some cases HCC can be treated through surgery and ablations but can be extended to a full transplant Risk factors for HCC have been elucidated in previous years linking hepatitis viruses diabetes and alcohol dependent conditions to the pathogenesis of HCC Given the prevalence of HCC in global populations currently 800 000 new cases per year and rising there is a requirement to identify molecular targets in HCC and develop new therapeutic strategies to manage and treat HCCs New technologies and techniques including gene sequencing bioinformatics and liquid biopsy have helped identify molecular and genetic players involved in the development of HCC As such a comprehensive genetic immune signature of HCC would be invaluable in the development of new therapeutics and treatment strategies as well as early identification and management of HCC There are currently various trials that implement a combination of already approved drugs to better the prognosis of patients suffering from HCC There is however still room for improvement and as our understanding of the various factors involved in HCC improves so will the prognosis of patients suffering from HCC globally This Research Topic aims to highlight the molecular and genetic targets that lead to the progression of Hepatocellular Carcinoma We welcome Original Research Reviews and other article types Characterization, Functions, and Roles of Antigen-Specific Regulatory T Cells in Health and Disease Giang Tran,Bruce Milne Hall,Lesley Ann Smyth,Nirupama Darshan Verma,2022-11-09 *Phenotypic Characterization, Genetics and Genomics of Livestock in Low Input Systems* Mohammed Ali Al Abri,Olivier Hubert Hanotte,Younes Miar,2022-10-19 *Genomic Characterization of Emerging Human Fungal Pathogens* Christina A. improved The topic is about artificial intelligence methods in biomedical images and genomics data for disease diagnosis treatment and prognosis as listed here Biomarker identification from biomedical images to predict disease diagnosis treatment and prognosis Radiogenomics image omics in identifying imaging biomarkers associated with molecular characteristics of the disease Machine learning deep learning methods in biomedical imaging or genomics for disease detection and precision medicine Prediction of histological characteristics of disease based on biomedical imaging Integration of radiomics and genomics features for disease diagnosis prognosis and prediction medicine Multimodality images or multi omics data integration methods Characterization of Immunoglobulin Variable Region Genes in Patients with Rheumatoid Arthritis Alice Wong (Ph.D. in immunology),1995 **A Bibliographical Monograph on Plant Genetics (genetic Analysis) 1900-1925** Hajime Matsuura,1929 *Saving the Tasmanian Devil* Carolyn Hogg,Samantha Fox,David Pemberton,Katherine Belov,2019-08-01 The Tasmanian devil is threatened by Devil Facial Tumour Disease DFTD a transmissible form of cancer that has reduced the population by over 80% Persecution extreme climate events vehicle collision and habitat destruction also put pressure on this endangered species The recovery effort to save the Tasmanian devil commenced over 15 years ago as a collaborative initiative between the Tasmanian government the Australian government the Zoo and Aquarium Association Australasia and many research institutions Saving the Tasmanian Devil documents the journey taken by partner organisations in discovering what DFTD is the effect it has on wild devil populations and the outcomes achieved through research and management actions Chapters describe all aspects of devil conservation including the captive devil populations applied pathology immunology and genetic research findings adaptive management and the importance of advocacy and partnerships This book will provide management practitioners and conservation scientists with insight into the complexities of undertaking a program of this scale and will also be of value to researchers students and others interested in conservation *Molecular Biomethods Handbook* John M.
