McCarthy, 2001-07-18 This volume which grows out of a research project on women and philanthropy sponsored by the Center for the Study of Philanthropy at the City University of New York expands our understanding of female beneficence in shaping diverse political cultures As in the United States this activity often enabled women to create parallel power structures that resembled but rarely replicated the commercial and political arenas of men From nuns who managed charitable and educational institutions to political activists demanding an end to discriminatory practices against women and children many of the women whose lives are documented in these pages claimed distinctive public roles through the nonprofit sphere The authors are from Europe the United States Latin America the Middle East Egypt India and Asia Their essays cover nations on every continent representing a variety of political and religious systems The essays in this book illustrate the extent to which government the market and religion have shaped the role of female philanthropy and philanthropists in different national settings By shifting the focus from organizations to donors and volunteers they begin to assess the relative importance of each of these factors in creating opportunities for citizen participation as well as the role of female philanthropy in opening a space for women in the public sphere From publisher's description *Women and Philanthropy* Sondra Shaw-Hardy, Martha A.
