Showman,1974 Editions for 1954 and 1967 by O Handlin and others      Social Science in the Crucible Mark C. Smith,1994 The 1920s and 30s were key decades for the history of American social science The success of such quantitative disciplines as economics and psychology during World War I forced social scientists to reexamine their methods and practices and to

consider recasting their field as a more objective science separated from its historical foundation in social reform. The debate that ensued fiercely conducted in books, articles, correspondence, and even presidential addresses made its way into every aspect of social science thought of the period and is the subject of this book. Mark C. Smith first provides a historical overview of the controversy over the nature and future of the social sciences in early twentieth-century America and then through a series of intellectual biographies offers an intensive study of the work and lives of major figures who participated in this debate. Using an extensive range of materials from published sources to manuscript collections, Smith examines objectivists, economist Wesley Mitchell and political scientist Charles Merriam and the more purposive thinkers, historian Charles Beard, sociologist Robert Lynd, and political scientist and neo-Freudian Harold Lasswell. He shows how the debate over objectivity and social purpose was central to their professional and personal lives as well as to an understanding of American social science between the two world wars. These biographies bring to vivid life a contentious moment in American intellectual history and reveal its significance in the shaping of social science in this country.
