**1959-1963** C.L. Camp, H.J. Allison, R.H. Nichols, and H. McGinnis, 1968 **Evolution: Genesis and Revelations** C. Leon Harris, 1981-01-01 In this comprehensive history of evolutionism C Leon Harris has combined primary source readings with clear pertinent background information to provide a solid basic understanding of the ways scientists have arrived at today's views of evolution Harris describes the major contributors to the theory of evolutionism placing each in the context of the general cultural influences to which he was exposed Each chapter also contains an explanation of the philosophical basis of the scientific approach of the period in question A lengthy bibliography provides direction for further reading on this important and timely subject [The Meaning of Fossils](#) Martin J.S. Rudwick, 2024-05-31 It is not often that a work can literally rewrite a person's view of a subject And this is exactly what Rudwick's book should do for many paleontologists view of the history of their own field Stephen J Gould Paleobotany and Palynology Rudwick has not merely written the first book length history of palaeontology in the English language he has written a very intelligent one His accounts of sources are rounded and organic he treats the structure of arguments as Cuvier handled fossil bones Roy S Porter History of Science

**Evolution** Peter J. Bowler, 1989-01-01 This edition of Evolution The History of an Idea is augmented by the most recent contributions to the history and study of evolutionary theory It includes an updated bibliography that offers an unparalleled guide to further reading As in the original edition Bowler's evenhanded approach not only clarifies the history of his controversial subject but also adds significantly to our understanding of contemporary debates over it The idea of evolution continued to evolve Back cover **The New Encyclopædia Britannica: Macropædia**, 1993 This encyclopedia includes a two volume index a 12 volume Micropaedia Ready reference a 17 volume Macropaedia Knowledge in depth and the Propaedia

**Making Modern Science, Second Edition** Peter J. Bowler, Iwan Rhys Morus, 2020-08-17 In this new edition of the top selling coursebook seasoned historians Peter J Bowler and Iwan Rhys Morus expand on their authoritative survey of how the development of science has shaped our world Exploring both the history of science and its influence on modern thought the authors chronicle the major developments in scientific thinking from the revolutionary ideas of the seventeenth century to contemporary issues in genetics physics and more Thoroughly revised and expanded the second edition draws on the latest research and scholarship It also contains two entirely new chapters one that explores the impact of computing on the development of science and another that shows how the West used science and technology as tools for geopolitical

expansion Designed for entry level college courses and as a single volume introduction for the general reader Making Modern Science presents the history of science not as a series of names and dates but as an interconnected and complex web of relationships joining science and society *History of Science* Alistair Cameron Crombie, Michael A. Hoskin, 1965 A review of literature and research in the history of science medicine and technology in its intellectual and social context

**The New Encyclopædia Britannica**, 1997 **Making Modern Science** Peter J. Bowler, Iwan Rhys Morus, 2010-02-24 The development of science according to respected scholars Peter J Bowler and Iwan Rhys Morus expands our knowledge and control of the world in ways that affect but are also affected by society and culture In Making Modern Science a text designed for introductory college courses in the history of science and as a single volume introduction for the general reader Bowler and Morus explore both the history of science itself and its influence on modern thought Opening with an introduction that explains developments in the history of science over the last three decades and the controversies these initiatives have engendered the book then proceeds in two parts The first section considers key episodes in the development of modern science including the Scientific Revolution and individual accomplishments in geology physics and biology The second section is an analysis of the most important themes stemming from the social relations of science the discoveries that force society to rethink its religious moral or philosophical values Making Modern Science thus chronicles all major developments in scientific thinking from the revolutionary ideas of the seventeenth century to the contemporary issues of evolutionism genetics nuclear physics and modern cosmology Written by seasoned historians this book will encourage students to see the history of science not as a series of names and dates but as an interconnected and complex web of relationships between science and modern society The first survey of its kind Making Modern Science is a much needed and accessible introduction to the history of science engagingly written for undergraduates and curious readers alike

*Keywords in Evolutionary Biology* Evelyn Fox Keller, Elisabeth Anne Lloyd, 1992 In science more than elsewhere a word is expected to mean what it says nothing more nothing less But scientific discourse is neither different nor separable from ordinary language meanings are multiple ambiguities ubiquitous Keywords in Evolutionary Biology grapples with this problem in a field especially prone to the confusion engendered by semantic imprecision Written by historians philosophers and biologists including among others Stephen Jay Gould Diane Paul John Beatty Robert Richards Richard Lewontin David Sloan Wilson Peter Bowler and Richard Dawkins these essays identify and explicate those terms in evolutionary biology which though commonly used are plagued by multiple concurrent and historically varying meanings By clarifying these terms in their many guises the editors Evelyn Fox Keller and Elisabeth Lloyd hope to focus attention on major scholarly problems in the field problems sometimes obscured sometimes reveals and sometimes even created by the use of such equivocal words Competition adaptation and fitness for instance are among the terms whose multiple meaning have led to more than merely semantic debates in evolutionary biology Exploring the complexity of keywords and clarifying their role in prominent issues

in the field this book will prove invaluable to scientists and philosophers trying to come to terms with evolutionary theory it will also serve as a useful guide to future research into the way in which scientific language works     *International Journal on the Unity of the Sciences* ,1991     **Historical Conceptions of Psychology** Julian Jaynes,1973     Biographical Books, 1950-1980 R.R.
