Charlie Steens Mi Vida:

Charlie Steen's Mi Vida Maxine Newell, 1992 **Quest for the Golden Circle** Arthur R. Gómez, 2000 Until World War II the Four Corners Region where New Mexico Colorado Utah and Arizona meet was a collection of isolated rural towns In the postwar baby boom era however small communities like Farmington New Mexico became bustling municipalities with rapidly expanding economies In *Quest for the Golden Circle* Arthur Gomez traces the development of the Four Corners two industries mining and tourism to discover how each contributed to the economic and urban transformation of this region during the 1950s and 1960s Focusing on four cities Durango Colorado Moab Utah Flagstaff Arizona and Farmington New Mexico Gomez chronicles how these towns played key roles in the West's dramatic postwar expansion Cities such as Denver Albuquerque Phoenix Tucson El Paso and Salt Lake City all grew through use of the abundant petroleum uranium natural gas timber and other natural resources extracted from the Four Corners region But the energy boom in these towns was not to last With the arrival of foreign oil bringing economic growth to a halt in the early 1970s town leaders turned again to the land to stimulate their economy This time the resource was a seemingly inexhaustible one tourism Gomez examines how business minded citizens marketed the area's scenic wonders and established the entire region as a tourist destination Their efforts were further assisted by the selection of stunning federal lands Mesa Verde Grand Canyon and Arches National Parks as treasures protected and promoted by the National Park Service Both mining and tourism however were beset by complex new problems and issues Extensive highways for instance were planned to bisect a Navajo reservation As Gomez illustrates the growing cities in the Four Corners region felt tremendous competing pressures between outside business powers and local needs as their extractive economy boomed and busted and as they then struggled to attract tourism dollars In addition he highlights the prominent roles played by federal agencies like the Atomic Energy Commission and the National Park Service in shaping regional destiny An outstanding analysis of the complexities of postwar development *Quest for the Golden Circle* successfully illuminates the history of one region within the larger story of the modern American West Uranium Frenzy Raye Ringholz, 2020-10-05 A history of the U S Atomic Energy Commission's need for uranium ore in the 1950s the frenzied search and the aftermath Now expanded to include the story of nuclear testing and its consequences *Uranium Frenzy* has become the classic account of the uranium rush that gripped the Colorado Plateau region in the 1950s Instigated by the U S government's need for uranium to fuel its growing atomic weapons program stimulated by Charlie Steen's lucrative *Mi Vida* strike in 1952 manned by rookie prospectors from all walks of life and driven to a fever pitch by penny stock promotions the boom created a colorful era in the Four Corners region and Salt Lake City where the stock frenzy was centered but ultimately went bust The thrill of those exciting times and the good fortune of some of the miners were countered by the darker aspects of uranium and its uses Miners were not well informed regarding the dangers of radioactive decay products Neither the government nor anyone else expended much effort educating them or protecting their health and safety The

effects of exposure to radiation in poorly ventilated mines appeared over time The uranium boom is only part of the larger story of atomic weapons testing and its impact in the western United States Nuclear explosions at the Nevada Test Site not only spurred uranium mining they also had a disastrous impact on many Americans downwinders in the eastward path of radiation clouds military observers and guinea pigs in exposed positions and Navajo and other uranium mill workers all became victims as deaths from cancer and other radiation caused diseases reached much higher than normal rates among them Tons of radioactive waste left by mines mills and the nuclear industry and how to dispose of them are other nagging legacies of the nuclear era Recent decades have brought multiple attempts by victims to obtain compensation from the federal government and other legal battles over disposal of nuclear waste When courts refused to grant relief to downwinders and others Congress eventually interceded and legislated compensation for a limited number of victims able to meet strict criteria but did not adequately fund the program Recently Congress attempted to fix this shortfall but in the meantime many downwinders and others holding compensation IOUs had died Congressional and other efforts to dispose of waste have lately focused on Nevada and Utah two states all too familiar with nuclear issues and reluctant to take on further radioactive burdens In a perceptive and touching narrative Ringholz *The Wilderness Handbook* recalls that the Federal government in the early 1950s subsidized uranium mining for the coming atomic age Ringholz intrigues the reader with an expert blending of science adventure industry mania finance human triumph and despair and shameful official neglect Publishers Weekly The frenzied search for a reliable domestic source of uranium ore needed by the U S Atomic Energy Commission in the 1950s is the subject of Ringholz s breezy narrative which is populated with colorful characters This is good popular reading for general collections in public libraries Library Journal
