Diminutiv Und Augmentativbildung Regeln Und Restriktionen:

Diminutives in English Klaus P. Schneider, 2012-10-24 That English has no diminutives is a common myth The present study shows however that English does possess diminutives and not only analytic but also synthetic diminutive markers Analytic markers include first and foremost little as well as other adjectives from the same word field whereas the inventory of synthetic markers comprises suffixes as for instance ie ette let kin een s er poo and pegs These markers are examined from a grammatical and a pragmatic perspective in an integrative formal functional framework The grammatical perspective involves phonological morphological and semantic features while the pragmatic perspective involves pragmalinguistic as well as sociopragmatic features on the levels of the speech act and larger interactive units in dialogue The findings reveal that English diminutive suffixes are in fact among the most productive suffixes of the English language While the suffixes share a number of features each has developed its own profile specifically regarding semantic and pragmatic features In everyday conversation there is a division of labour between the synthetic and the analytic type of formation concerning the communicative functions of diminutives and their distribution in discourse The choice of formal device and its function depend crucially on pragmatic factors notably on the illocution the interactive status the realisation strategy and the politeness value of the utterances in which diminutives are employed and also on the relationship between the interlocutors

Structures, Strategies and Beyond Elisa Di Domenico, Cornelia Hamann, Simona Matteini, 2015-08-15 The volume contains 18 contributions from senior and junior scholars covering core issues within the theoretical investigation of the architecture and the mechanisms of the faculty of language with particular emphasis on the computational component They all pursue a comparative approach investigating and comparing different languages and dialects or comparing different modes of acquisition as in Adriana Belletti's work to whom the volume is dedicated The papers in the first part by Chomsky Rizzi Bianchi Chesi Cinque Costa Calabrese deal with theoretical issues such as labeling the cartography of structures and the locality of derivations in a broad sense The papers in the second part by Haegeman Lohndal Delfitto Fiorin Cruschina Lahousse Di Domenico and Contemori Dal Pozzo Matteini concentrate on the realization of structure relative to discourse particularly on topic and focus positions in the vP periphery and on referential dependencies The third part collects papers by Cardinaletti Volpato Friedmann Yachini Szterman Snyder Hyams Hamann Tuller Cecchetto Donati Grewendorf Poletto that specifically target intervention effects in relative clauses as apparent in different structures different languages and different populations
