**Dinosaur in a Haystack** Stephen Jay Gould, 2011-10 Gould's seventh collection of essays covers a wide range of subjects in natural history literature and popular culture from the wisdom of Charles Darwin to that of the Old Testament Psalms from the dinosaurs of Jurassic Park to the dinosaurs of the latest scientific theories from the thwarted humanity of the Frankenstein monster to the inhuman fallacies of eugenics and other pseudoscience With black and white illustrations Here is a new collection of Gould's unexpected connections between evolution and all manner of subjects literature high among them Gathered from his monthly column in Natural History magazine these articles should delight surprise and inform his vast readership as have his six prior volumes of essays Somehow the light bulb pops on every month as his deadline approaches some glowing fact pulled out of memory often a line from Shakespeare or Tennyson that illumines a generality Gould wishes to discuss Nature red in tooth and claw Lord Alfred's line induces dilations on the extent science can inform moral matters not much Gould believes a remembrance of the infamous Wansee protocol prompts Gould's denunciation of the genocidal looting of evolutionary theory and by extension its vulnerability to ignoramuses in general These two examples of the Gouldian essay method fortunately don't foreshadow a gloomy parade of topics Gould can as easily alight at the fun house where mass culture absorbs ideas about evolution through movies of monsters run amok from Frankenstein to Jurassic Park In other essays he plunges directly into matters of evolutionary interpretation but customarily employs a literary twist who else but Gould could link Edgar Allan Poe with his own area of professional eminence the paleontology of snails A discovery awaits in every essay in every haystack which solidifies Gould as one of the most eloquent science popularizers writing today Booklist

**Dinosaur in a Haystack**, 1996 **Dinosaurs at the Dinner Party** Edward Dolnick, 2025-08-12 From the bestselling author of *The Clockwork Universe* and *The Writing of the Gods* an utterly delightful hugely entertaining Air Mail book about the eccentric Victorians who discovered dinosaur bones leading to a whole new understanding of human history In the early 1800s the natural world was a safe and cozy place or so people believed But then a twelve year old farm boy in Massachusetts stumbled on a row of fossilized three toed footprints the size of dinner plates the first dinosaur tracks ever found Soon in England scientists unearthed enormous bones that reached as high as a man's head Outside of myths and fairy tales no one had even imagined that creatures like three toed giants had once lumbered across the land nor dreamed that they could all have vanished hundreds of millions of years ago In *Dinosaurs at the Dinner Party* celebrated storyteller and historian Edward Dolnick leads us through a compelling true adventure as the paleontologists of the early 19th century puzzled their way through the fossil record to create the story of dinosaurs we know today The tale begins with Mary Anning a poor uneducated woman who had a sixth sense for finding fossils buried deep inside cliffs moves to William Buckland an eccentric geologist who filled his home with specimens and famously pieced together a prehistoric scene from the fossil record inside a cave and then on to the controversial Richard Owen the era's best known scientist and the one who coined the term dinosaur Exuberant Kirkus Reviews entertaining erudite and featuring an unconventional cast of characters *Dinosaurs at the Dinner Party* tells the story of how the accidental discovery of prehistoric creatures upended humanity's understanding of the world and its own place within it *A Short History of Nearly Everything* Bill Bryson, 2025-12-16 THE 1 NATIONAL BESTSELLER One of the world's most beloved writers and New York Times bestselling author of *A Walk in the Woods* and *The Body* takes his ultimate journey into the most intriguing and intractable questions that science seeks to answer Brims with strange and amazing facts destined to become a modern classic of science writing The New York Times In *A Walk in the Woods* Bill Bryson trekked the Appalachian Trail well most of it In *A Sunburned Country* he confronted some of the most lethal wildlife Australia has to offer Now in his biggest book he confronts his greatest challenge to understand and if possible answer the oldest biggest questions we have posed about the universe and ourselves Taking as territory everything from the Big Bang to the rise of civilization Bryson seeks to understand how we got from there being nothing at all to there being us To that end he has attached himself to a host of the world's most advanced and often obsessed archaeologists

anthropologists and mathematicians travelling to their offices laboratories and field camps He has read or tried to read their books pestered them with questions apprenticed himself to their powerful minds A Short History of Nearly Everything is the record of this quest and it is a sometimes profound sometimes funny and always supremely clear and entertaining adventure in the realms of human knowledge as only Bill Bryson can render it Science has never been more involving or entertaining
