Dinomania Boria Sax, 2018-10-15 From Jurassic Park to Sue the T Rex and Barney our dino love affair is as real as astonishing and as incomprehensible as the gargantuan beasts themselves At once reptilian and avian dinosaurs enable us to imagine a world far beyond the usual boundaries of time culture and physiology We envision them in diverse and contradictory ways from purple friends to toothy terrors reflecting in part our changing conceptions of ourselves Not unlike humans today dinosaurs seem at once powerful almost godly and helpless in the face of cosmic forces even more powerful than themselves In Dinomania Boria Sax a leading authority on human animal relations tells the story of our unlikely romance with the titanic saurians from the discovery of their enormous bones relics of an ancient world to the dinosaur theme parks of today That discovery around the start of the nineteenth century was intimately tied to our growing awareness of geological time and the dawn of the industrial era Dinosaurs vast size and power called to mind railroads battleships and factories making them paradoxically emblems of modernity But at the same time their world was nature at its most pristine and unsullied the perfect symbol of childhood innocence and wonder Sax concludes that in our imaginations dinosaurs essentially are and always have been dragons and as we enter a new era of environmental threats in which dinos provide us a way to confront indirectly the possibility of human extinction their representation is again blending with the myth and legend from which it emerged at the start of the modern age Fun and ferocious and featuring many superb illustrations of dinosaurs from art popular culture film and advertising Dinomania is a thought provoking homage to humanity's enduring dinosaur
