

Dioxins in the environment

Dioxins are widespread – all people exposed to a low background concentrations of dioxins

Human exposure:

- > 90% of human intake is through food
- fish, meat, and dairy are most important sources
- concern about dioxin exposure in infants and breast-fed children owing to greatly elevated intake of dioxins

Besides *background exposure*, people may also be exposed to dioxins through *accidental exposure* (e.g., the Seveso Disaster) or *occupational exposure* (e.g., in some chemical industries).

Mean intake: 50 – 200 pg/day for an adult (60 kg)

Dioxins In The Environment:

Dioxins in the Environment Great Britain. Central Directorate of Environmental Protection, 1989 *Dioxins in the Environment* Michael A. Kamrin, Paul W. Rodgers, 1985 Human and Environmental Risks of Chlorinated Dioxins and Related Compounds Richard E. Tucker, 2012-12-06 Increasing international concern is being expressed regarding the contamination of the environment with polychlorinated dibenzo p dioxins PCDDs and polychlorinated dibenzofurans because certain of these chemicals have been shown to be highly toxic to animals and are ubiquitous in the environment They are known to be distributed as contaminants of commercial products and as by products from combustion processes A considerable volume of information has accumulated on these chemicals in the past two decades particularly for the most toxic of them 2,3,7,8-tetrachlorodibenzo p dioxin 2,3,7,8-TCDD However this body of knowledge has not succeeded in resolving genuine judgmental differences among experts in the field as to the degree of hazard to human health and the environment In light of the widespread public concern it is clearly imperative to come to grips with the continuing scientific controversy to review the data assess the issues to see where areas of agreement exist and where further research is needed to resolve remaining areas of disagreement This volume represents an effort to contribute to these goals *Dioxins and Health* A. Schecter, 1994-12-31 This book originated in a series of cross disciplinary conversations in the years 1984-1990 between the editor who is a physician researcher involved in clinical and laboratory research and a dioxin toxicologist During the years in which the conversations took place an extraordinary amount of new scientific literature was published related to dioxins defined for purposes of this text as the chlorinated dibenzo p dioxins dibenzofurans polychlorinated biphenyls PCBs and other compounds that are structurally and toxicologically similar to 2,3,7,8-tetrachlorodibenzo p dioxin 2,3,7,8-TCDD the most extensively studied and most toxic of this group of chemicals Dioxins also began to interest not only chemists and toxicologists but also specialists from diverse disciplines such as wildlife and environmental science immunology neuroscience public health epidemiology medicine government law sociology and journalism Specialists from such varied disciplines while familiar with their own literature frequently did not have time to follow the dioxin literature outside their specialty area In addition each specialty had unique knowledge methods and perspectives Cross disciplinary conversation was necessary but all too frequently specialists from the various disciplines did not speak the same language resulting in misunderstanding Dying from Dioxin Lois Marie Gibbs, 1997 Gibbs one of the original activists from the contaminated neighborhoods at Love Canal explains what dioxin is and describes how it affects human health summarizing the September 1994 EPA draft report on dioxin and important reports published since the EPA report She reviews the politics surrounding Dioxin Sudarshan Kurwadkar, Prabir Mandal, Shivani Soni, 2020-01-20 Dioxin Environmental Fate and Health Ecological Consequences offers a unique and comprehensive coverage of dioxins and their congeners once they are released to the environment The book provides readers with a systematic understanding of past and emerging sources of dioxins current

dioxins inventories and historical trends fate and long range transboundary atmospheric transport human health and ecological risk and regulatory perspective Providing an excellent analysis of dioxin exposure through the food chain and impact on human health it also documents the environmental implications of dioxins on ecological flora and fauna The book offers readers a holistic understanding about dioxins their atmospheric fate and transport distribution in various environmental matrices and various routes and exposure pathways through which human beings are exposed to this persistent organic pollutant It further offers an insight into the toxicological profile and mechanistic analysis of the onset of cancer remediation technologies and existing regulatory framework to deal with the problems associated with dioxins The book will serve as an excellent resource to environmental professionals particularly environmental toxicologists environmental health professionals remediation engineers environmental regulatory agencies policymakers and environmental law professionals **EPA's Science Plan for Activities Related to Dioxins in the Environment**, 2009

The U S Environmental Protection Agency is currently addressing several issues related to dioxins and dioxin like chemicals in the environment These include the comprehensive human health and exposure assessment for dioxin commonly called the dioxin reassessment and a review of dioxin soil clean up levels currently in use across the United States To move forward with both of these efforts as well as other dioxin related activities a plan with interim milestones has been developed

Dioxins in the Environment Ontario. Ministry of the Environment, 1986 *EPA Oversight on Dioxin Contamination* United States. Congress. House. Committee on Science and Technology. Subcommittee on Natural Resources, Agriculture Research, and Environment, 1984 **Dioxins and Dioxin-like Compounds in the Food Supply** Institute of Medicine, Food and Nutrition Board, Committee on the Implications of Dioxin in the Food Supply, 2003-11-21 Dioxin and dioxin like compounds or DLCs are found throughout the environment in soil water and air People are exposed to these unintentional environmental contaminants primarily through the food supply although at low levels particularly by eating animal fat in meat dairy products and fish While the amount of DLCs in the environment has declined since the late 1970s the public continues to be concerned about the safety of the food supply and the potential adverse health effects of DLC exposure especially in groups such as developing fetuses and infants who are more sensitive to the toxic effects of these compounds Dioxins and Dioxin like Compounds in the Food Supply Strategies to Decrease Exposure recommends policy options to reduce exposure to these contaminants while considering how implementing these options could both reduce health risks and affect nutrition particularly in sensitive and highly exposed groups if dietary changes are suggested Dioxin Contamination of Food and Water United States. Dioxins in the Environment Great Britain. Interdepartmental Working Group on Polychlorinated Dibenzo-para-dioxins and Polychlorinated Dibenzofurans,1986 **Dioxins** ,1988 *Dioxin Contamination of Milk* United States. Congress. House. Committee on Energy and Commerce. Subcommittee on Health and the Environment,1990 Abstract The House subcommittee on Health and the Environment published this report on dioxin contamination of milk Testimony by FDS officials and industry spokesman concerning research conducted on dioxin contamination of milk from bleached paper cartons and action being taken to alleviate the problems included Health Risks from Dioxin and Related Compounds National Research Council,Division on Earth and Life Studies,Board on Environmental Studies and Toxicology,Committee on EPA's Exposure and Human Health Reassessment of TCDD and Related Compounds,2006-11-20 Although the U S Environmental Protection Agency presented a comprehensive review of the scientific literature in its 2003 draft reassessment of the risks of dioxin the agency did not sufficiently quantify the uncertainties and variabilities associated with the risks nor did it adequately justify the assumptions used to estimate them according to this new report from the National Academies National Research Council The committee that wrote the report recommended that EPA re estimate the risks using several different assumptions and better communicate the uncertainties in those estimates The agency also should explain more clearly how it selects both the data upon which the reassessment is based and the methods used to analyze them **Scientific Integrity and Federal Policies and Mandates** United States. Congress. House. Committee on Science. Subcommittee on Energy and Environment,1996 Putting the Lid on Dioxins ,1994 *Chlorinated Dioxins & Related Compounds* O. Hutzinger,R. W. Frei,E. Merian,Maurizio Pocchiari,2013-10-22 The complex multidisciplinary problem posed by PCDD can best be understood by the interaction of scientists from different disciplines This workshop was organised to allow scientific exchange by such experts The most recent advances in analytical methodology environmental fate and levels incineration toxicology metabolism animal toxicology and observations in man are covered
