beautiful—or so dangerous*

DIPPER OF COPPER CREEK

by JEAN CRAIGHEAD GEORGE
author of *My Side of the Mountain*
et JOHN GEORGE

Dipper Of Copper Greek

H.W. Wilson Company

Dipper Of Copper Creek:

Dipper of Copper Creek Jean Craighead George, John Lothar George, 1996 Presents the intersecting stories of a boy's quest for independence during a stay with his grandfather in the Colorado Rockies and the maturation of a bird that lives in the waterfalls of a mountain stream

Birds and Mammals of the Sierra Nevada Lowell Sumner, Joseph S. Dixon, 2023-04-28 Birds and Mammals of the Sierra Nevada chronicles decades of ecological and zoological research conducted in Sequoia and Kings Canyon National Parks tracing its origins to a 1916 expedition by the Museum of Vertebrate Zoology at the University of California. The book provides an in-depth account of wildlife surveys across varied ecosystems detailing the collection and identification of specimens including birds, mammals, reptiles, and amphibians. From the early Sequoia Survey to expanded research conducted by renowned zoologists like Joseph S. Dixon and Adolph Murie, the volume synthesizes a wealth of field data and life history observations. This work bridges early cross-sectional studies such as those on Yosemite and Lassen regions with ecological studies conducted through the mid-20th century, offering a comprehensive view of the Sierra's biodiversity and environmental dynamics. Prepared under the auspices of the National Park Service and enriched by collaboration with scientists, park staff, and naturalists, this volume goes beyond species descriptions. It incorporates ecological insights, behavioral studies, and critical updates to nomenclature, ensuring accuracy for both professional and casual readers. The publication integrates specimen photographs, detailed accounts of fieldwork, and expertly curated data from museum collections. With contributions from notable figures in vertebrate zoology and botany and input from dedicated park rangers, the book is an invaluable resource for understanding the rich natural heritage of the Sierra Nevada, aimed at both enhancing public knowledge and supporting future research. This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1953.

Curious Minds Perry Zurn, Dani S. Bassett, 2023-09-05 An exhilarating genre-bending exploration of curiosity's powerful capacity to connect ideas and people. Curious about something? Google it. Look at it. Ask a question. But is curiosity simply information seeking? According to this exhilarating genre-bending book, what's left out of the conventional understanding of curiosity are the wandering tracks, the weaving concepts, the knitting of ideas, and the thatching of knowledge systems, the networks, the relations between ideas and between people. Curiosity, say Perry Zurn and Dani Bassett, is a practice of connection; it connects ideas into networks of knowledge and it connects knowers themselves both to the knowledge they seek and to each other. Zurn and Bassett, identical twins who write that their book represents the thought of one mind and two bodies, harness their respective expertise in the humanities and the sciences to get irrepressibly curious about curiosity. Traipsing across literatures of antiquity and medieval science, Victorian poetry and nature essays, as well as work by writers from a variety of

marginalized communities they trace a multitudinous curiosity They identify three styles of curiosity the busybody who collects stories creating loose knowledge networks the hunter who hunts down secrets or discoveries creating tight networks and the dancer who takes leaps of creative imagination creating loopy ones Investigating what happens in a curious brain they offer an accessible account of the network neuroscience of curiosity And they sketch out a new kind of curiosity centric and inclusive education that embraces everyone s curiosity The book performs the very curiosity that it describes inviting readers to participate to be curious with the book and not simply about it **Report** Nevada.
