Directions In Functional Linguistics Studies In Language Companion Series:

Directions in Functional Linguistics Akio Kamio, 1997 Functional linguistics is concerned with the function of language and considers it an essence of human language. Views like this are not particularly new but rather traditional in the history of linguistics. But today functional linguistics is constituted by a wide range of theoretical and methodological concerns. What unifies them as functional is the concern with discourse. This is quite natural since language can only function in discourse, not as isolated sentences. This collection of papers reflects some of the major approaches and methodologies in contemporary functional linguistics in Japan and the United States. Based on the fundamental concerns with discourse, the nine articles deal with a variety of up-to-date topics in functionalism and present numerous analyses, discussing from the question of basic grammatical categories to the inadequacy of some representative analyses in formal linguistics. This book is intended for readers with a wide scope of interest, for example, for those who are interested in discourse and conversational analysis, information structure, modality, aspect, morphology, and syntax. Readers will learn how various contemporary functional linguistics is and yet how fundamental the role of discourse is throughout the functional inquiry in language.

Chimariko Grammar Carmen Jany, 2009-10-01 The Chimariko language, now extinct, was spoken in Trinity County, California. This reference grammar, based on data collected by Harrington in the 1920s, represents the most comprehensive description of the language. Written from a functional typological perspective, this work also examines language contact in Northern California, showing that grammatical traits are often shared among genetically unrelated languages in geographically contiguous areas.

Antipassive Katarzyna Janic, Alena Witzlack-Makarevich, 2021-03-15 This book provides a comprehensive treatment of the morpho-syntactic and semantic aspects of the antipassive construction from synchronic, diachronic, and typological perspectives. The nineteen contributions assembled in this volume address a wide range of aspects pertinent to the antipassive construction, such as lexical semantics, the properties of the antipassive markers, as well as the issue of fuzzy boundaries between the antipassive construction and a range of other formally and functionally similar constructions in genealogically and areally diverse languages. Purely synchronically oriented case studies are supplemented by contributions that shed light on the diachronic development of the antipassive construction and the antipassive markers. The book should be of central interest to many scholars, in particular to those working in the field of language typology, semantics, syntax, and historical linguistics, as well as to specialists of the language families discussed in the individual contributions.

Transitivity and Object Marking in Biblical Hebrew Peter Bekins, 2018-08-14 Based on author's dissertation, doctoral Hebrew Union College Jewish Institute of Religion, 2012.

Teaching and Learning (Im)Politeness Barbara Pizziconi, Miriam A. Locher, 2015-11-13 This collection combines research from the field of (im)politeness studies with research on language pedagogy and language learning. It aims to engender a useful dialogue between (im)politeness theorists, language teachers, and SLA researchers, and also to broaden the enquiry to naturalistic contexts other than L2 acquisition.
