International Business Research Esther L. Gil, Awilda Reyes, 2012-12-28 In the 21st century most businesses participate in globalization whether by entering new markets worldwide or dealing with competitors from around the world. In addition, the Internet and the accelerated evolution of related tools such as social media provide businesses as well as individuals the means to participate globally at an increasing pace. In order to identify profitable business opportunities and to recognize potential obstacles, one must have a complete picture of the global business environment. The Web and other Internet tools also give both new and traditional producers of information additional ways to deliver content to the end user, including interactive web-based databases, digital files, or Twitter updates to name a few. Taking these trends into consideration, *International Business Research: Strategies and Resources* provides the basic tools that are useful for doing international business research. Following an introduction that outlines the foundation for international business activity, money, the international monetary system, and financial markets, subsequent chapters address essential information such as sources, organizations, and websites that list resources for specific regions and countries; how to find international company information and financial data; the major classification schemes used to find relevant industry data, including import/export statistics and international market and industry research. Each chapter of *International Business Research* includes research recommendations based upon the authors' practical experiences and discusses the sources available to meet research needs, making this a valuable tool for anyone involved in the business world, particularly business school librarians, business students, and business professionals.

Business Information Sources Lorna M. Daniells, 1976-01-01 Annotated bibliography and guide to sources of information on business and management includes material relating to accounting, taxation, computers, and management information systems; insurance; real estate; business marketing; personnel management; labour relations, etc.

International Business Information Michael Halperin, Ruth A. Pagell, 2024-02-02 This newly updated and expanded edition of a reference bestseller is the only work available that guides business researchers and librarians to the most valuable sources for information on international business and shows how to interpret and use that data. The authors discuss the best available resources and how to use them to find answers to a wide range of questions about international business. They also describe business practices in various regions and countries, the basics of international trade and finance, international business organizations, and relevant political departments and agencies. Many exhibits and tables are included, and the book's appendices include glossaries, checklists for evaluating sources, and sample disclosure documents.

Guide to Sources for Agricultural and Biological Research J. Richard Blanchard, Lois Farrell, 2021-02-26 This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, *Voices Revived* makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1981.
