Disarmament And Nuclear Weapons:

Documents on Disarmament United States. Arms Control and Disarmament Agency, 1962 **Stable Nuclear Zero** Sverre Lodgaard, 2016-08-12 This volume examines the conditions necessary for a stable nuclear weapons free world and the implications for nuclear disarmament policy The Nuclear Non Proliferation Treaty NPT is a road map to nuclear zero but it is a rudimentary one and it says nothing about the kind of zero to aim for Preferably this would be a world where the inhibitions against reversal are strong enough to make it stably non nuclear What then are the requirements of stable zero The literature on nuclear disarmament has paid little attention to this question By and large the focus has been on the next steps and discussions tend to stop where the NPT stops with the elimination of the weapons This book seeks to fill a lacuna by examining the requirements of stable zero and their implications for the road map to that goal starting from the vision to the present day The volume highlights that a clear conception of the goal not only is important in itself but can shed light on what kind of disarmament process to promote This book will be of much interest to students of nuclear proliferation global governance security studies and IR **Nuclear Issues on the Agenda of the Conference on Disarmament** Thomas Bernauer, 1991 UNIDIR 91 68 **Nuclear Disarmament and Non-Proliferation** Sverre Lodgaard, 2010-10-18 A PDF version of this book is available for free in open access via www.tandfebooks.com as well as the OAPEN Library platform www.oapen.org It has been made available under a Creative Commons Attribution Non Commercial No Derivatives 3 0 license and is part of the OAPEN UK research project This book examines the current debate on nuclear non proliferation and disarmament notably the international non proliferation regime and how to implement its disarmament provisions Discussing the requirements of a new international consensus on nuclear disarmament and non proliferation this book builds on the three pillars of the nuclear non proliferation treaty NPT non proliferation disarmament and peaceful uses of nuclear energy It reviews the impact of Cold War and post Cold War policies on current disarmament initiatives and analyses contemporary proliferation problems how to deal with the states that never joined the NPT India Pakistan and Israel how states that have been moving toward nuclear weapons have been brought back to non nuclear weapon status and in particular how to deal with Iran and North Korea The analysis centres on the relationship between disarmament and non proliferation in an increasingly multi centric world involving China and India as well as the US the European powers and Russia It concludes with a description and discussion of three different worlds without nuclear weapons and their implications for nuclear disarmament policies This book will be of great interest to all students of arms control strategic studies war and conflict studies and IR security studies in general Sverre Lodgaard is a Senior Research Fellow at the Norwegian Institute of International Affairs Oslo [Getting to Zero](#) Catherine Kelleher, Judith Reppy, 2011-03-02 Getting to Zero is an edited volume of chapters about the implications of total nuclear disarmament for international security and national security covering a range of perspectives **Nuclear Disarmament in International Law** Haralambos

Athanasopulos,2000-02-01 When German physicists Otto Hahn and Fritz Strassman first split the uranium atom in 1938 they might have little imagined the potential power their experiments had unleashed Since the United States successfully detonated the first atomic weapons in 1945 the entire world has lived in fear of annihilation Technological advances in weaponry and importantly their delivery systems have only heightened the sense of dread Yet since the end of World War II world governments have been unable to agree on a strategy for nuclear disarmament This led first to the Cold War and ultimately to the proliferation of nuclear weapons throughout the world This work examines the nuclear question within the framework of international law The advent of the nuclear age and its impact on postwar peace and law is first covered This is followed by analyses of the initial United Nations disarmament initiatives and the reasons they were doomed from the start The globalization of the Cold War the expansion of the nuclear arms race and the START treaties and the legacy of 1970s era detente efforts in the years leading up to the end of the Cold War are then detailed How the United Nations reacted to the end of the Cold War and the prospects for disarmament in the 21st century are the subjects of the concluding section

Strategic Stalemate Michael Krepon,1984-06-18 The Legality of Threat Or Use of Nuclear Weapons John Burroughs,1998 The 20th century has been defined in large part by the unleashing of the terrible destructive power of the atom and the subsequent struggle to overcome the threat of nuclear annihilation If humankind survives the 8 July 1996 Advisory Opinion of the International Court of Justice and the extraordinary process that led up to it will have played an essential role The Il legality of the Threat or Use of Nuclear Weapons is a concise yet thorough guide to the case In straightforward language it describes the history of this unprecedented initiative and summarizes and explains states arguments to the Court the Court s findings and the separate statements of the judges The author provides cogent expert analysis and most importantly reveals how the opinion imparts hope and points the way to the future Book Jacket Nuclear Non-Proliferation in International Law - Volume VI Jonathan L. Black-Branch,Dieter Fleck,2021-07-26 This sixth volume of the book series on Nuclear Non Proliferation in International Law focuses on current legal challenges regarding nuclear disarmament and security The Series on Nuclear Non Proliferation in International Law provides scholarly research articles with critical commentaries on relevant treaty law best practice and legal developments thus offering an academic analysis and information on practical legal and diplomatic developments both globally and regionally It sets a basis for further constructive discourse at both national and international levels Jonathan L Black Branch is Chair of the ILA Committee on Nuclear Weapons Non Proliferation and Contemporary International Law and President and CEO of ISLAND The Foundation for International Society of Law and Nuclear Disarmament Dieter Fleck is Former Director International Agreements Member of the Advisory Board of the Amsterdam Center for International Law ACIL Rapporteur of the International Law Association ILA Committee on Nuclear Weapons Non Proliferation Contemporary International Law **Nuclear Disarmament** Bård Steen,Olav Njølstad,2019-03-14 This volume Nuclear Disarmament provides a comprehensive overview

of nuclear disarmament and a critical assessment of the way forward. Comprising essays by leading scholars on nuclear disarmament, the book highlights arguments in favour and against a world without nuclear weapons, global zero. In doing so, it proposes a new baseline from which an everchanging nuclear arms control and disarmament agenda can be assessed. Numerous paths to nuclear disarmament have been proposed and scrutinized, and with an increasing number of countries signing off on the Treaty on the Prohibition of Nuclear Weapons, it is vital to ask which path is the most likely and realistic to succeed. The chapters here also address the rapid pace of technological, political, and climatic developments in relation to nuclear disarmament and how they add to the complexity of the issue. Taking care to unite the different tribes in the debate, this book provides a community of dissent at a time when academic tribalism all too often prevents genuine debates from taking place. This book will be of interest to students of nuclear proliferation, arms control, security studies, and International Relations.

The Treaty Prohibiting Nuclear Weapons Alexander Kmentt, 2021-05-17. This book chronicles the genesis of the negotiations that led to the Treaty on the Prohibition of Nuclear Weapons (TPNW), which challenged the established nuclear order. The work provides readers with an authoritative account of the complex evolution of the Humanitarian Initiative (HI) and the negotiation history of the TPNW. It includes a close analysis of internal strategy documents and communications in the author's possession, which trace the tactical and political decisions of a small group of state actors. By demonstrating the unacceptable humanitarian consequences and uncontrollable risks that these weapons pose to everyone's security, the HI convinced many states to ban nuclear weapons and reject the policy of nuclear deterrence as unsustainable and illegitimate. As such, this book is a case study of multilateral diplomacy and cooperation between state and civil society actors. It also contains a full discussion of both sides of the nuclear argument and assesses the extent to which the HI and the TPNW have moved the dial and present opportunities for transformational change. This book will be of much interest to students of nuclear disarmament, arms control, and non-proliferation, diplomacy, global governance, and International Relations in general.

A World Free from Nuclear Weapons Drew Christiansen, Carole Sargent, 2020-08-03. On November 10, 2017, Pope Francis became the first pontiff in the nuclear era to take a complete stand against nuclear weapons, even as a form of deterrence. At a Vatican conference of leaders in the field of disarmament, he made it clear that the possession of the bomb itself was immoral. *A World Free from Nuclear Weapons* presents the pope's address and original testimony from Nobel Peace Prize laureates, religious leaders, diplomats, and civil society activists. These luminaries, which include the pope and a Hiroshima survivor, make the moral case against possessing, manufacturing, and deploying nuclear arms. Drew Christiansen, a member of the Holy See delegation to the 2017 United Nations conference that negotiated the Treaty to Prohibit Nuclear Weapons, helps readers to understand this conference in its historical context. *A World Free from Nuclear Weapons* is a critical companion for scholars of modern Catholicism, moral theology, and peace studies, as well as policymakers working on effective disarmament. It shows how the Church's revised position presents an opportunity for global leaders to connect

disarmament to larger movements for peace pointing toward future action *International Negotiations on the Treaty on the Nonproliferation of Nuclear Weapons* United States. Global Nuclear Disarmament Nik Hynek, Michal Smetana, 2015-12-22 This book examines the issue of nuclear disarmament in different strategic political and regional contexts This volume seeks to provide a rich theoretical and practical insight to one of the major topics in the field of international security global abolishment of nuclear weapons Renewed calls for a nuclear weapons free world have sparked a wide academic debate on both the attainability of such goal and the steps that should be taken Comparably less attention however has been paid to theoretically informed considerations of the consequences of nuclear abolition Comprising essays from leading scholars and experts within the field this collection discusses the fundamental theoretical and conceptual foundations of nuclear disarmament and subsequently tries to assess its hypothetical impact in global and regional contexts The varied methodological approach of the contributors aims to advance a multi theoretical and multi perspectival view of the issue The book is organized in three main sections Strategic Perspectives dealing with the specific constraints and facilitators for the states to achieve their core objectives Political Perspectives with the focus on the power of norms belief systems and ideas and Regional Perspectives with the analyses of seven regional and or state specific nuclear contexts As a whole the volume provides a detailed complex overview of the risks and opportunities that are embedded in the vision of a nuclear weapon free world This book will be of great interest to students of nuclear proliferation arms control war and conflict studies international relations and security studies *The Arms Control, Disarmament, and Military Security Dictionary* Jeffrey M. Elliot, Robert Reginald, 2007-09-01 This facsimile reprint of the 1989 edition is according to Library Journal a wonderfully concise and comprehensive resource on a very

important topic In 268 detailed entries the authors provide a wealth of information on such topics as the arms race conventional and nuclear weapons nuclear strategy and disarmament The entries are cross referenced and there is an index Of great value to general readers as well as specialists *Nuclear Non-Proliferation in International Law - Volume I* Jonathan L. Black-Branch, Dieter Fleck, 2014-07-22 The volume discusses the legal interpretation and implementation of the three pillars of the Treaty of the Non Proliferation of Nuclear Weapons 1968 regarding the non proliferation of nuclear weapons the right to develop research production and use of nuclear energy for peaceful purposes and issues relating to nuclear disarmament It examines the status of international law regarding nuclear capacity considering competing legal approaches to the development of nuclear technology non proliferation disarmament and regulating nuclear weapons within a contemporary international context *Abolishing Nuclear Weapons* George Perkovich, 2017-10-03 Nuclear disarmament is firmly back on the international agenda But almost all current thinking on the subject is focused on the process of reducing the number of weapons from thousands to hundreds This rigorous analysis examines the challenges that exist to abolishing nuclear weapons completely and suggests what can be done now to start overcoming them The paper argues that the difficulties of getting to zero must not preclude many steps being taken in that direction It thus begins by examining steps that nuclear armed states could take in cooperation with others to move towards a world in which the task of prohibiting nuclear weapons could be realistically envisaged The remainder of the paper focuses on the more distant prospect of prohibiting nuclear weapons beginning with the challenge of verifying the transition from low numbers to zero It moves on to examine how the civilian nuclear industry could be managed in a nuclear weapons free world so as to prevent rearmament The paper then considers what political security conditions would be required to make a nuclear weapons ban enforceable and explores how enforcement might work in practice Finally it addresses the latent capability to produce nuclear weapons that would inevitably exist after abolition and asks whether this is a barrier to disarmament or whether it can be managed to meet the security needs of a world newly free of the bomb **Slaying the Nuclear Dragon** Tanya Ogilvie-White, David Santoro, 2012-03-01 In recent decades the debate on nuclear weapons has focused overwhelmingly on proliferation and nonproliferation dynamics In a series of Wall Street Journal articles however George Shultz William Perry Henry Kissinger and Sam Nunn called on governments to rid the world of nuclear weapons helping to put disarmament back into international security discussions More recently U S president Barack Obama prominent U S congressional members of both political parties and a number of influential foreign leaders have espoused the idea of a world free of nuclear weapons Turning this vision into reality requires an understanding of the forces driving disarmament forward and those holding it back Slaying the Nuclear Dragon provides in depth objective analysis of current nuclear disarmament dynamics Examining the political state level factors that drive and stall progress contributors highlight the challenges and opportunities faced by proponents of disarmament These essays show that although conditions are favorable for significant reductions numerous

hurdles still exist Contributors look at three categories of states those that generate momentum for disarmament those with policies that are problematic for disarmament and those that actively hinder progress whether openly secretly deliberately or inadvertently Nuclear deterrence was long credited with preventing war between the two major Cold War powers but with the spread of nuclear technology threats have shifted to other state powers and to nonstate groups Slaying the Nuclear Dragon addresses an urgent need to examine nuclear disarmament in a realistic nonideological manner
