Disarmament Sketches Three Decades Of Arms Control And International Law:

Disarmament Sketches Thomas Graham, 2002 Thomas Graham Jr played a role in the negotiation of every major international arms control and non proliferation agreement signed by the United States during the past thirty years As a U S government lawyer and diplomat he helped to shape negotiate and secure U S ratification of such cornerstones of international security as SALT START and the ABM INF and CFE treaties as well as conventions prohibiting biological and chemical weapons Graham s memoir offers a history of the key negotiations which have substantially reduced the threat of nuclear war His is a personal account of bureaucratic battles over arms control in six administrations navigating among the White House Congress cabinet secretaries and agencies with overlapping responsibilities and often competing interests No comparable text brings together detailed analyses of so many pivotal documents in the history of the Cold War it offers abundant primary source material for historians international lawyers and arms control specialists around the world

Disarmament Sketches also charts the rise and fall of the Arms Control and Disarmament Agency the only U S government agency with primary responsibility for arms control policy and lays out an agenda for continuing progress in reducing weapons stockpiles around the globe Throughout his career Graham has worked tirelessly to reverse the nuclear arms race and to persuade leaders around the world to make their nations safer by renouncing and reducing their weapons of mass destruction

The SAGE Handbook of Globalization Manfred Steger, Paul Battersby, Joseph Siracusa, 2014-05-22 Global studies is a fresh and dynamic discipline area that promises to reinvigorate undergraduate and postgraduate education in the social sciences and humanities In the Australian context the interdisciplinary pedagogy that defines global studies is gaining wider acceptance as a coherent and necessary approach to the study of global change Through the Global Studies Consortium GSC this new discipline is forming around an impressive body of international scholars who define their expertise in global terms The GSC paves the way for the expansion of global studies programs internationally and for the development of teaching and research collaboration on a global scale Mark Juergensmeyer and Helmut Anheier s forthcoming *Encyclopaedia of Global Studies* with SAGE is evidence of this growing international collaboration while the work of Professor Manfred Steger exemplifies the flourishing academic literature on globalization RMIT University s Global Cities Institute represents a substantial institutional investment in interdisciplinary research into the social and environmental implications of globalization in which it leads the way internationally Given these developments the time is right for a book series that draws together diverse scholarship in global studies This Handbook allows for extended treatment of critical issues that are of major interest to researchers and students in this emerging field The topics covered speak to an interdisciplinary approach to the study of global issues that reaches well beyond the confines of international relations and political science to encompass sociology anthropology history media and cultural studies economics and governance environmental sustainability international law and criminal justice Specially commissioned chapters explore diverse subjects

from a global vantage point and all deliberately cohere around core global concerns of narrative praxis space and place This integrated approach sets the Handbook apart from its competitors and distinguishes Global Studies as the most equipped academic discipline with which to address the scope and pace of global change in the 21st century

Weapons of Mass Destruction Eric A. Croddy, James J. Wirtz, Jeffrey A. Larsen, 2004-12-22 The first accessible reference to cover the history context current issues and key concepts surrounding biological chemical and nuclear weapons A collection of information on everything from aerosols to zones of peace these two volumes cover historical background technology and strategic implications of biological chemical and nuclear weapons thus providing facts terms and context needed to participate in contemporary policy debate This encyclopedia is the only comprehensive reference dedicated to the three types of weapons of mass destruction With over 500 entries arranged alphabetically volume one covers biological and chemical weapons while volume two focuses on nuclear weapons Experts from eight countries cover issues related to these weapons policies strategies technologies delivery vehicles arms control concepts treaties and key historical figures and locations Entries are written to make difficult concepts easy to understand by cutting through military and scientific jargon Students lay readers scientists and government policy makers are provided with the broad range of information needed to place today's policy discussions in proper strategic or historical context

Weapons of Mass Destruction Joseph M. Siracusa, Aiden Warren, 2017-03-29 Whether possessed by a state or non state actor the specter of Weapons of Mass Destruction WMDs and more specifically nuclear weapons and their associated material present a significant threat to global security Notwithstanding the fact that there are fewer nuclear weapons today than the massive stockpiles that existed during the height of the Cold War the complexities relating to nuclear security have in many ways intensified amid globalization and porous borders More states in volatile regions possess such weapons UN Security Council states are busily modernizing their weapons and non states actors have made it clear their intention to use such weapons should they attain them The emerging prospect of a cyber attack or a misunderstanding that could potentially evolve into a limited regional nuclear war would both have dire global ramifications and are scenarios that should not be considered farfetched Additionally concerns pertaining to chemical and biological weapons the associated ramifications relating to nuclear terrorism and broader limitations of the NPT regime all pose major challenges to global stability In considering all of these areas this foundational primer for the Rowman and Littlefield WMD Series seeks to inform and advance policy debate in ways that support international security while also adding important connective tissue between analytical areas in the IR and historical domains that often remain separate Offering a comprehensive analysis of the evolution and current status of WMDs this volume will be of great interest to scholars analysts and students of security studies international history and international relations

Hegemon's Tool Kit Rebecca Davis Gibbons,2022-07-15 At a moment when the nuclear nonproliferation regime is under duress Rebecca Davis Gibbons provides a trenchant analysis of the international system that has for more than fifty years controlled the spread of these catastrophic weapons The Hegemon s Tool Kit details how that regime works and how disastrously it might falter In the early nuclear age experts anticipated that all technologically capable states would build these powerful devices That did not happen Widespread development of nuclear arms did not occur in large part because a global nuclear nonproliferation regime was created By the late 1960s the United States and the Soviet Union had drafted the Treaty on the Non Proliferation of Nuclear Weapons NPT and across decades the regime has expanded with more agreements and more nations participating As a result in 2022 only nine states possess nuclear weapons Why do most states in the international system adhere to the nuclear nonproliferation regime The answer lies Gibbons asserts in decades of painstaking efforts undertaken by the US government As the most powerful state during the nuclear age the United States had many tools with which to persuade other states to join or otherwise support nonproliferation agreements The waning of US global influence Gibbons shows in The Hegemon s Tool Kit is a key threat to the nonproliferation regime So too is the deepening global divide over progress on nuclear disarmament To date the Chinese government is not taking significant steps to support the nuclear nonproliferation regime and as a result the regime may face a harmful leadership gap

International Journal ,2003 **Foreign Service Journal** ,2002 **Historical Dictionary of Nuclear, Biological, and Chemical Warfare** Benjamin C. Garrett,John Hart,2007 Human experience with nuclear biological and chemical NBC warfare has been limited especially in comparison to conventional forms of warfare Our experience with nuclear warfare is confined to a period of less than one week during the end of World War II when the United States successfully used two nuclear weapons against targets in Japan The course of biological warfare and modern use of biological weapons are difficult to track owing to the difficulty of differentiating deliberate use from natural outbreaks However the keen potential of biological weapons in acts of terror was shown in the mass disruption caused in the fall 2001 experience in the U S with the release of anthrax through the American postal system Chemical weapons have been used in a handful of conflicts since their introduction to modern warfare during World War I most recently during the Iran Iraq War during the 1980s Despite this limited experience NBC warfare continues to exert a certain fascination among states The Historical Dictionary of Nuclear Biological and Chemical Warfare covers the development and use of NBC weapons as well as efforts to limit or control the use of these weapons through a chronology a bibliography an introductory essay and dictionary entries Over 500 cross referenced dictionary entries provide a unique selection of terms related to NBC warfare ranging from basic descriptions of substances used in NBC warfare to details on incidents and episodes where NBC weapons were used Entries are structured around historical events persons important to NBC warfare countries where such weapons have been developed or used and international treaties and treaty related organizations *Reagan, Bush, Gorbachev* Norman A. Graebner,Richard Dean Burns,Joseph M. Siracusa,2008-06-30 Chronicles the evolution of the political relationship between Reagan and Mikhail Gorbachev and that relationship s role in ending the Cold War **Britain and the Americas [3 volumes]** Will Kaufman,Heidi Slettedahl Macpherson,2005
