Roman Disasters Jerry Toner,2013-07-10 Roman Disasters looks at how the Romans coped with thought about and used disasters for their own ends Rome has been famous throughout history for its great triumphs Yet Rome also suffered colossal disasters From the battle of Cannae where fifty thousand men fell in a single day to the destruction of Pompeii to the first appearance of the bubonic plague the Romans experienced large scale calamities Earthquakes fires floods and famines also regularly afflicted them This insightful book is the first to treat such disasters as a conceptual unity It shows that vulnerability to disasters was affected by politics social status ideology and economics Above all it illustrates how the resilience of their political and cultural system allowed the Romans to survive the impact of these life threatening events The book also explores the important role disaster narratives played in Christian thought and rhetoric Engaging and accessible Roman Disasters will be enjoyed by students and general readers alike **The Destruction of Civilization about 10,500 B.C.** Martin K. Ettington, There is much of human history which we don t know due to lost records the oceans covering our ancestor s cities natural disasters and reasons we don t know There are also many anomalies which have been found showing ruins and objects from the far past which should not exist Some of the Historical Facts this book is based on Plato said that Atlantis was destroyed 9 000 years before his time in Greece Plato lived in 433 B C which would have meant Atlantis was destroyed 9 433 years B C or 11 433 years before the current age The Younger Dryas Period in History was between roughly 12 900 and 11 600 years ago according to paleontologists and archeologists Many researchers think this period of climate change resulted from comets hitting the Earth at this time The Vulture Stone at Gobekli Tepe which some scientists have interpreted as having a record of comets hitting the Earth about 11 000 B C My study on ancient history has led me to write a number of books on the topic which can be found on my website at this link <https://mkettingtonbooks.com/ancient-history.html> The above facts and all of my research has led me to conclude that there were ancient world spanning civilizations

which existed and were destroyed on the Earth in the 9 000 B C to 11 000 B C period There may have been earlier civilizations too but the focus of this book is on that time period The following chapters review some of the evidence of these ancient civilizations which existed at these same very ancient times
