Creep Effect and Prediction Method of Dynamic Disaster of Surrounding Rock Zhijie Wen, Jian Tao, Zhenqi Song, Yujun Zuo, 2025-08-02 This open access book provides a comprehensive overview of the author's in depth insights into the theory prediction methods and developmental trends of creep instability and failure in coal rock masses within mining stopes The content primarily covers topics such as creep instability of coal rock masses in stopes creep instability of surrounding rock in roadways large scale roof creep instability creep instability of overlying strata in goaf rockburst gas outburst and principles and prediction of roof creep instability in fully mechanized mining faces Additionally it explores theoretical advancements in analyzing the energy principles of coal rock masses and acoustic wave monitoring of coal rock systems This book serves as a valuable reference for professionals and researchers in mining engineering mine construction underground space engineering and geotechnical engineering as well as for faculty and students in related fields

AI and ML in Early Warning Systems for Natural Disasters, 2025-11-10 AI and ML in Early Warning Systems for Natural Disasters bridges the gap between advanced

computational models and real world disaster management practices by highlighting how data driven intelligence can enhance resilience planning and reduce risks in the face of climate change and extreme environmental events Beginning with an overview of traditional early warning systems and the limitations they face in accuracy and timeliness The book sheds light on to AI and ML driven approaches detailing predictive analytics anomaly detection sensor networks geospatial data integration and IoT enabled monitoring systems Case studies on earthquake prediction flood forecasting cyclone tracking and wildfire detection illustrate the practical applicability of AI powered models across diverse contexts Later chapters examine legal frameworks ethical considerations and community based strategies that ensure responsible sustainable and inclusive deployment of these technologies Key Features Presents AI and ML techniques for predictive analytics anomaly detection and risk modeling in disaster scenarios Demonstrates real world applications through case studies on earthquakes floods cyclones and wildfires Explores integration of satellite imagery remote sensing and IoT based sensor networks for real time monitoring Assesses legal regulatory and ethical frameworks shaping AI use in disaster preparedness Provides multidisciplinary insights blending computer science engineering and disaster management for resilient community planning

Intelligent Interpretation for Geological Disasters Weitao Chen,Cheng Zhong,Xuwen Qin,Lizhe Wang,2023-09-12

This book comprehensively utilizes the new generation of artificial intelligence and remote sensing science and technology to systematically carry out researches on high precision recognition monitoring analysis and assessment of geological disasters by using different technologies of ground airspace and space based systems and different scales of target semantic region The main contents include 1 Intelligent interpretation theory and methods of geological disasters 2 Intelligent analysis of landslide based on long term ground monitoring data 3 Intelligent analysis of landslide evolution based on optical satellite remote sensing data 4 Deep learning based remote sensing detection of landslide 5 Intelligent assessment methods of landslide susceptibility 6 Intelligent recognition of ground figure based on airspace based remote sensing data The book is of interest to graduate student scientific and technological personnel who work in the area of geological disasters natural hazards remote sensing and artificial intelligence

AI and Emerging Technologies for Emergency Response and Smart Cities Mobo, Froilan D.,2025-04-23 Emerging technologies are transforming diverse industries enhancing efficiency and safety Artificial intelligence AI in particular can be useful for enhancing emergency response systems and developing smart cities and campuses They can be leveraged to improve urban safety streamline emergency management and create sustainable smart environments As a result AI is an innovative solution for creating a safer future AI and Emerging Technologies for Emergency Response and Smart Cities provides insights into the latest technological advancements and discusses the challenges ethical considerations and future directions in the rapidly evolving field of urban development Covering topics such as disaster risk management weapon identification and early warning systems this book is an excellent resource for urban developers policymakers professionals researchers scholars academicians and more Shipwrecks Nigel
