

# What are the 8 dimensions of quality?

- The 8 dimensions of quality are used at a strategic level to analyze the product or service quality characteristics. They were first described by Harvard Business School Professor David A. Garvin in 1987.
- Instead of defensive measures to pre-empt quality control, Garvin proposed that American companies take a more aggressive stance where quality itself would be the basis of product differentiation and a competitive strategy to secure market share.
- The 8 dimensions of quality are performance, features, reliability, conformance, durability, serviceability, aesthetics, and perceived quality. Some dimensions are mutually reinforcing, while others are not.
