## **Dinas Bok:**

*Dina's Book* Herbjørg Wassmo, 1994 The story of a tempestuous woman married off at an early age to an old man When he abruptly dies she takes over his estate and begins bending people to her will The setting is 19th century Norway

*Reflections in a Shattered Mirror* Sarah Jeanette Root Paulson, 1993      *The Norseman*, 1995      *Historical Dictionary of Scandinavian Literature and Theater* Jan Sjøvik, 2006-04-19 The literature of Scandinavia is amazingly rich and varied consisting of the works produced by the countries of Denmark Norway Sweden Finland and Iceland and stretching from the ancient Norse Sagas to the present day While much of it is unknown outside of the region some has gained worldwide popularity including the fairy tales of Hans Christian Andersen the stories of Isak Dinesen and the plays of Henrik Ibsen and August Strindberg While obviously including the area's most famous works the *Historical Dictionary of Scandinavian Literature and Theater* also provides information on lesser known authors and current trends literary circles and journals and historical background This is accomplished through a list of acronyms a chronology an introductory essay a bibliography and several hundred cross referenced dictionary entries which together make this reference the most comprehensive and up to date work of its kind related to Scandinavian literature and theater available anywhere      Seeing through Multilingual Corpora Stig Johansson, 2007-02-14 Through electronic corpora we can observe patterns which we were unaware of before or only vaguely glimpsed The availability of multilingual corpora has led to a renewal of contrastive studies We gain new insight into similarities and differences between languages at the same time as the characteristics of each language are brought into relief The present book focuses on the work in building and using the English Norwegian Parallel Corpus and the Oslo Multilingual Corpus Case studies are reported on lexis grammar and discourse A concluding chapter sums up problems and prospects of corpus based contrastive studies including applications in lexicography translator training and foreign language teaching Though the main focus is on English and Norwegian the approach should be of interest more generally for corpus based contrastive research and for language studies in general Seeing through corpora we can see through language

**Norwegian Literature**, 1995      **Particles in German, English, and Beyond** Remus Gergel, Ingo Reich, Augustin Speyer, 2022-08-15 Germanic languages have been recognized as having not only intensifying or focus particles but also so called modal particles The relevant items are specialized discourse markers joined by characteristic syntactic properties After an introductory overview of the complex field the contributions of the current volume capitalize on but also work much further beyond the baseline of the established insights They offer analyses of a new data types within and sometimes across several Germanic languages e.g. varieties stages of German Dutch or Norwegian encompassing different classes of particles and a variety of syntactic semantic as well as usage based aspects b the classical dichotomy between languages like German and English when it comes to the availability of modal particles both synchronically and diachronically c crucial integrated insight from non Germanic languages such as French Hungarian Italian Mandarin or Vietnamese A number of mostly

interface based proposals of several languages as well as further generalizations are put on the table for both expert and novice readers in the field

**Patterns in Contrast** Jarle Ebeling, Signe Oksefjell Ebeling, 2013-09-17 Combining the fields of phraseology and contrastive analysis this book describes how patterns defined as recurrent word combinations with semantic unity behave cross linguistically As the contrastive approach adopted in the book relies on translations and a bidirectional corpus model the first part offers an in depth discussion of contrastive linguistics with special emphasis on using translations as tertium comparationis and a parallel corpus as the main source of material Central to the contrastive analysis is the use of corpus linguistic methods in the identification of patterns while a deeper understanding of the phraseological nature of the patterns is closely related to the concept of extended units of meaning The second part of the book presents five case studies using an easy to follow step by step method to illustrate the phraseological contrastive approach at work The studies show that patterns weave an intricate web of meanings across languages and demonstrate the potential of exploring patterns in contrast

**Encyclopedia of Nordic Crime Fiction** Mitzi M.
