## **Dingoes Dont Bark:**

**Dingoes Don't Bark** Lionel Hudson,1974      **Dingo** Brad Purcell,2010-09-01 Many present day Australians see the dingo as a threat and a pest to human production systems An alternative viewpoint which is more in tune with Indigenous culture allows others to see the dingo as a means to improve human civilisation The dingo has thus become trapped between the status of pest animal and totemic creature This book helps readers to recognise this dichotomy as a deeper understanding of dingo behaviour is now possible through new technologies which have made it easier to monitor their daily lives Recent research on genetic structure has indicated that dingo purity may be a human construct and the genetic relatedness of wild dingo packs has been analysed for the first time GPS telemetry and passive camera traps are new technologies that provide unique ways to monitor movements of dingoes and analyses of their diet indicate that dietary shifts occur during the different biological seasons of dingoes showing that they have a functional role in Australian landscapes Dingo brings together more than 50 years of observations to provide a comprehensive portrayal of the life of a dingo Throughout this book dingoes are compared with other hypercarnivores such as wolves and African wild dogs highlighting the similarities between dingoes and other large canid species around the world      **Similar but Different in the Animal Kingdom** Martina Nicolls,2017-05-08 Similar but Different in the Animal Kingdom is an educational science book for children youth schools libraries and anyone interested in animals Learn about the similarities and differences between twenty five sets of animals bees and wasps frogs and toads gophers and hamsters falcons and hawks herons and storks ants and termites donkeys and mules and more What are the similarities and differences between alligators and crocodiles Which one has a U shaped snout and which one has a V shaped snout What are the similarities and differences between fleas and ticks Which one is not an insect Are wallabies just small kangaroos Emus and ostriches are similar because they can t fly but they have different feet Which one has two toes and which one has three Salmon and tuna have different tails whereas octopuses and squids have the same number of hearts Butterflies and moths have different antennae Which one has club shaped antennae and which one has feathery antennae Can cheetahs or leopards climb trees and which one can t roar Do dolphins and porpoises have similar dorsal fins Do foxes and wolves have more similarities or more differences Similar but Different in the Animal Kingdom has the answers This intriguing look at the animal kingdom provides Fast Facts with an instant list of the animals main similarities and differences as well as their scientific classifications descriptions habitats diets breeding habits and much more There are interesting facts fallacies phrases singular and plural animal words collective nouns and a glossary of scientific terms      **In the Desert: Jimmy Pike As a Boy** Pat Lowe,2007-04-02 Jimmy Pike is one of Australia s most famous Aboriginal artists represented in collections in all major Australian public galleries and museums He grew up in the Great Sandy Desert during the 1940s and 1950s This is his story as told by his lifetime partner English born Pat Lowe who spent three years in the desert with him and many more years listening to his stories This remarkable and

intimate account of what was a traditional Walmajarri boyhood one of the last of its kind opens your eyes to a completely different culture and way of experiencing the world The startling fact is that after 60 000 years following a nomadic hunter gatherer way of life the exodus of the Walmajarri people from the desert occurred in only one or two generations after white settlement

**Keystone Species That Live in Deserts** Bonnie Hinman,2015-09 Most arches built today contain a single building block at the top that is the most important piece This special piece can be found in the arches of soaring cathedrals doorways in temples and even simple buildings made out of wooden blocks It is called a keystone and it holds everything else together Remove the keystone and the building or doorway is likely to collapse The same thing is true in nature Certain species of animals and plants are so important to their ecosystems that if they disappear the whole system may collapse They are called keystone species Some keystone species are large like white rhinos while others are quite small like honey bees But size doesn't matter in an ecosystem All living things rely on other species to survive A keystone species plays an especially large role that affects many different species in an ecosystem Some keystone species are at the top of a huge ecosystem like the Greater Yellowstone Ecosystem while others may affect a tiny ecosystem in a river or forest Whether the ecosystem is big or small the result of a keystone species disappearing or being greatly reduced is the same Just like one falling domino can cause many others to fall the loss of a keystone species can lead to the extinction of many other species Today scientists are focusing more attention on preserving the natural balance in ecosystems Identifying and protecting keystone species is an important part of their work

**The Dingo Debate** Bradley Smith,2015-08-03 The Dingo Debate explores the intriguing and relatively unknown story of Australia's most controversial animal the dingo Throughout its existence the dingo has been shaped by its interactions with human societies With this as a central theme the book traces the story of the dingo from its beginnings as a semi domesticated wild dog in South east Asia to its current status as a wild Australian native animal under threat of extinction It describes how dingoes made their way to Australia their subsequent relationship with Indigenous Australians their successful adaption to the Australian landscape and their constant battle against the agricultural industry During these events the dingo has demonstrated an unparalleled intelligence and adaptable nature seen in few species The book concludes with a discussion of what the future of the dingo in Australia might look like what we can learn from our past relationship with dingoes and how this can help to allow a peaceful co existence The Dingo Debate reveals the real dingo beneath the popular stereotypes providing an account of the dingo's behaviour ecology impacts and management according to scientific and scholarly evidence rather than hearsay This book will appeal to anyone with an interest in Australian natural history wild canids and the relationship between humans and carnivores
