Tooth and Claw Deborah Noyes, 2019-04-30 The tale of the epic rivalry between two foundational paleontologists to find bigger and better bones in the American West perfect for readers of Steve Sheinkin and Candace Fleming Today we take for granted the idea that dinosaurs once roamed the earth But two hundred years ago the very concept of an extinct species did not exist When an English scientist proposed in 1841 that Dinosaurs terrible lizards had come and gone it was only a theory a new way of explaining the dragon and giant bones scattered across the globe But when proof turned up seventeen years later it was not only incontrovertible it was massive Tooth and Claw tells the story of the feverish race

between two brilliant driven and insanely competitive scientists Edward Drinker Cope and Othniel Charles Marsh to uncover more and more monstrous fossils in the newly opened Wild West Between them they discovered dozens of major dinosaur species and established the new discipline of paleontology in America But their bitter thirty year rivalry a war waged on wild plains and mountains in tabloid newsprint and in Congress dramatically wrecked their professional and private lives even as it brought alive for the public a vanished prehistoric world *DINO WARS: THE DINOSAUR'S BIGGEST, BADDEST*
