Dinosaur Alive:

Dinosaurs in Fantastic Fiction Allen A. Debus, 2013-03-25 From the first illustrated edition of Jules Verne's *Journey to the Center of the Earth* in 1867 dinosaurs and prehistory have fascinated readers. Writers would time and again come back to dinosaurs as an element of fantastic fiction often using these creatures through the venue of the written word to reflect the world of the writers own time. This literary survey examines how paleoliterature originated, developed and matured to the present day. Also discussed are the ways in which dinosaur fiction mirrors contemporary ideas about subjects such as geology, the Cold War, environmentalism, time travel, evolution and bioengineering. Featured authors include Ray Bradbury, H. G. Wells and Poul Anderson among others. In select cases the novelizations of movie scripts are also examined. An appendix provides brief summaries of deserving dinosaur texts.

Dinamation's Dinosaur's Alive! Dinamation International Corporation, 1993-01-01 Presents photographs of life sized computer controlled dinosaur models and facts about ten different prehistoric creatures from the Dinamation exhibits.

Kaleidoscope of Dinosaurs and Prehistoric Life Greer Stothers, 2022-02-15 What colors were the dinosaurs? Find out in this kaleidoscopic look at the technicolor world of dinosaurs and other prehistoric beasts as they may have looked. A richly detailed and vibrantly illustrated natural history book, this fascinating read is bursting with color and will show you dinosaurs like never before. Discover cutting edge theories on feathered dinosaurs, the colourful secrets of the fossil record and what million year old remains tell us about how extinct animals lived and looked. Paleo artist and author Greer Stothers reimagines the dinosaurs and their prehistoric peers using fossils and the examples of living species to bring this often misrepresented world to life. Could big dinosaurs have been gray like elephants? Would a snow dwelling dino have been a brilliant white? What could mutant dinosaurs look like? As well as the dinos, there's also a section that takes a look at other extinct animals, shows how animals from the Ice Age may have looked and explores how clues about long dead creatures can be discovered from art by the prehistoric peoples who encountered them. This is a beautifully illustrated first look at the kaleidoscopic world of dinosaurs and other creatures for young children and makes a gorgeous gift for young paleontologists and art lovers alike.
