The Reconstruction of Nations Timothy Snyder, 2002-12-01 Modern nationalism in northeastern Europe has often led to violence and then reconciliation between nations with bloody pasts In this fascinating book Timothy Snyder traces the emergence of Polish Ukrainian Lithuanian and Belarusian nationhood over four centuries discusses various atrocities including the first account of the massive Ukrainian Polish ethnic cleansings of the 1940s and examines Poland's recent successful negotiations with its newly independent Eastern neighbors as it has channeled national interest toward peace

Humanitarian Intervention in Somalia Bibliography, 1995

Humanitarianism Under Fire Ken Rutherford, 2008 The international humanitarian intervention in Somalia was one of the most challenging operations ever conducted by US and UN military forces Until Somalia the UN had never run a Chapter VII exercise with large numbers of troops operating under a fighting mandate It became a deadly test of the UN's ability carry out a peace operation using force against an adversary determined to sabotage the intervention Humanitarianism Under Fire is a candid detailed historical and political narrative of this remarkably complicated intervention that was one of the first cases of multilateral action in the post Cold War era Rutherford presents new information gleaned from interviews and intensive research in five countries His evidence shows how Somalia became a turning point in the relationship between the UN and US and how policy and strategy decisions in military operations continue to refer back to this singular event even today

The Diplomatic Record

1992-1993 ALLAN. GOODMAN, Taylor & Francis Group, 2019-05-31

Books in Print, 1994

Foreign Service Journal, 1996

A Guide to the Sources of United States Military History Robin Higham, Donald J. Mrozek, 1998

Bridging the European Divide Joshua B. Spero, 2004-10-20 Do middle powers matter geopolitically to great powers when confronting the unconventional twenty first century threats from nation states or nonstate actors By studying certain middle power politics in the heart of early anarchical and volatile post Cold War Europe we can better grasp the impact such middle powers have in the aftermath of September 11 2001 Bridging the European Divide explores how key regional middle powers perceived and advocated their political power options and tells the largely untold story behind the motives of significant middle power decisions and repercussions Such regional alignment decisions stemmed from the ideas opportunities and realities necessary to transform nation states amid acute regional uncertainty global upheaval and international systemic change In order to achieve a better understanding of how to bridge the post 9 11 gap between changes in material incentives and the role of ideas Spero smartly connects two different types of power politics ways of assessing security dilemmas and foreign policy decisions and reasons why middle powers and their geopolitical roles matter to great powers

The Foreign Policy of the Bush Administration Steven Hurst, 1999 In this important work Steven Hurst demonstrates how the much criticized Bush administration dealt effectively and skillfully with the massive upheavals associated with the end of the Cold War and began to shape a coherent US foreign policy for the post Cold War era Using government documents and recently published

memoirs of key policymakers Hurst provides the most detailed account so far of the policymaking processes of the Bush administration He provides new insights into those policy areas which have already received critical attention including relations with the USSR and the Persian Gulf Crisis as well as neglected fields such as US Latin American relations Finally the author addresses the much derided concept of the New World Order He demonstrates that far from being a meaningless phrase dreamed up by Bush during the Gulf Crisis the New World Order actually represented a coherent strategy founded in American values and foreign policy tradition and forms a logical and sustainable basis for US foreign policy in the post Cold War era

Defense By Other Means Jason D. Ellis, 2001-08-30 The quest to limit nuclear weapons was a notable feature of the U S Soviet relationship during the Cold War Following the collapse of the Soviet Union in what history may come to judge as the Clinton administration's greatest foreign policy achievement an agreement was reached with key former Soviet republics to eliminate their nuclear weapons Ellis provides a timely and authoritative analysis of the Cooperative Threat Reduction CTR program which removed nuclear arsenals equivalent to the combined stockpiles of Britain France and China and ultimately made a significant contribution to U S national security at a relatively small cost In a fascinating examination of the interplay of domestic and foreign policy Ellis traces the debates within Congress and the foreign policy establishment as well as the situation on the ground in Ukraine Belarus and Kazakhstan and he details the implementation of the CTR program He concludes with a look at the current challenges especially the thousands of non strategic nuclear warheads still in Russian possession and prospects of ongoing CTR efforts

Poland's Security Policy 1989-2000 Roman Kuźniar, 2001

The Coalition Paradox Nora Bensahel, 1999 **Congressional Record**, 1875 **Tabloid Wars** Matthew A. Baum, 2000

In the 1990s Americans witnessed live televised images of U S soldiers dragged through the streets of Mogadishu wounded American prisoners of war paraded in front of video cameras in Iraq and Kosovo while their families were interviewed simultaneously on live television at home and scud missile attacks in Israel and Saudi Arabia during the Persian Gulf War These events have brought foreign policy directly into America's living rooms By transforming complex distant events into entertaining and compelling human dramas these images have captured the American public's attention to a far greater extent than printed reports photographs and tape delayed videos ever could Does the nature and extent of media coverage of foreign crises influence public opinion in ways that affect presidential decisionmaking and if so how I argue that the Information Revolution has fundamentally changed how the media covers foreign crises that as a result Americans are becoming more attentive to such crises and in turn that an attentive public makes it difficult for presidents to use force as a foreign policy tool I employ content analyses of media coverage of various foreign crises and statistical analyses of public opinion surveys to demonstrate trends in public opinion and to relate increases in attentiveness to changes in the mass media particularly television I find that even as the Americans declare themselves in countless surveys to be less concerned with foreign affairs in the post Cold War era than at any time since World War II they are simultaneously growing increasingly

attentive to foreign crises I then develop a formal model to derive hypotheses concerning when and how public opinion will influence presidential crisis decisionmaking To test the hypotheses I conduct statistical analyses of all U S post WWII foreign crises and a case study of the 199294 U S intervention in Somalia I find that an attentive public can inhibit presidents from escalating foreign crises particularly if the strategic stakes involved are relatively modest I also find evidence of a growing reluctance by the U S to become engaged in low stakes military operations and increasingly risk averse tactics in those low stakes conflicts in which the U S becomes involved *Books in Print Supplement* ,1994
