Direct Realism A Study Of Perception:

Direct Realism Moltke S. Gram,1983-09-30 a vigorous and challenging defence of direct realism in which one gets not only a clear overview of what precisely the problems are but also a forceful and often insightful attempt to solve them the book makes a highly readable and stimulating contribution to recent literature in the philosophy of perception Critical Philosophy 2 1 1985

Direct Realism D. Gram,2011-10-12 or their surfaces can be translated without remainder into descriptions of objects that are neither material objects or surfaces of any material object All of these claims have historically conspired to discredit Direct Realism But Direct Realism can accommodate all of the premises of the three arguments without admitting any of their conclusions Inferential perceptual knowledge assumes a kind of knowledge that is not inferential Without this assumption we are given a vicious infinite regress But this is compatible with the fact that any case of non inferential knowledge has a material object as its object The fact of infallible perceptual awareness fails to discredit Direct Realism for similar reasons Infallibility is a characteristic not of the objects which we perceive but rather of the acts by which we perceive them And this permits an object of such awareness to be either material or something other than material It does not follow from the fact of infallibility that the objects of awareness must be other than material objects And finally the fact of translatability shows at most that we either can or must simultaneously perceive material objects and entities which are not material objects It does not show that the perception of the one is the same as the perception of the other The entire argument rests as we shall learn on an illicit assimilation of the notions of sameness and equivalence

Smith,2005-01-01 In a major Contribution to the theory of perception A D Smith presents a truly original defense of direct realism the view that in perception we are directly aware of things in a physical world It offers two arguments against direct realism one concerning illusion and one concerning hallucination that upto now no theory of perception could adequately rebut At the heart of Smiths theory is a new way of drawing the distinction between perception and sensation alone with an unusual treatment of the nature of object of hallucination **Direct versus Indirect Realism** John R.
