**Direct Theory** Edward S. Small, 1994 A historical and theoretical survey of the international body of film and video loosely labeled Small examines the development of experimental film and video as direct theory and major genre the European and American and experimental video Annotation copyright by Book News Inc Portland OR Direct Theory Edward S. Small, Timothy W. Johnson, 2013-08-02 Making the case for the significance of experimental motion pictures Undulating water patterns designs etched or painted directly onto clear or black film leader computer generated pulsating multihued light tapestries the visual images that often constitute experimental motion pictures are unlike anything found in either fictive narratives or documentary works Thus Direct Theory provides an historical and theoretical survey of this overlooked and misunderstood body of international films videos and digital productions that offers a strong case for the understanding of experimental motion pictures as a separate major motion picture genre In a radical revision of film theory that incorporates Ferdinand de Saussure s semiotic system and adds to it historian Raymond Fielding s technological determinism Edward S Small and Timothy W Johnson argue that experimental moviemaking constitutes a special mode of theory that bypasses written and spoken words By exploring the development of experimental motion pictures over nine decades they trace the practice from its beginnings in the European avant garde movement in the 1920s through American underground productions into international structuralist works that marked the experimental films of the 1970 s and finally the digital experimental innovations of the twenty first century To demonstrate that the aesthetic of experimental motion pictures is best understood separately from other major film genres such as fictive narrative and documentary Small and Johnson highlight eight defining technical and structural characteristics of experimental productions including the autonomy of the artist economic independence brevity and the use of dreams reveries hallucinations and other mental imagery They also highlight a number of films including Ralph Steiner s 1929 H2O and Bruce Conner s 1958 A Movie and provide a sampling of frames from them to demonstrate that the heightened reflexivity of these films transmit meaning through images rather than words A deft historical interweaving of experimental production and scholarly discourse this thought provoking work firmly establishes the importance of experimental motion pictures in the discipline of film studies theory and history and production Direct Theory Edward S.
