Statistics Dept.,2015-10-29 This paper presents the 2015 yearbook of the Direction of Trade Statistics DOTS Quarterly issues of this publication provide for about 160 countries tables with current data or estimates on the value of imports from and exports to their most important trading partners In addition similar summary tables for the world industrial countries and developing countries are included The yearbook provides for the most recent seven years detailed trade data by country for approximately 184 countries the world and major areas The information on exports and imports by trading partners that countries report to the Fund varies in terms of frequency and currentness In order to provide guidance regarding the sources of the figures for individual countries figures in the country world and area pages are shown with symbols to the right of the figure Country pages include lines for all partner countries that have been reported estimated or extrapolated Direction of Trade Statistics Yearbook, 1986 Edition International Monetary Fund. Statistics Dept.,1986-01-01 The Direction of Trade Statistics Online service provides data on the value of merchandise exports and imports between each country and all its trading partners The database includes total bilateral and multilateral exports and imports aggregated at national or regional group level data from 1948 at monthly quarterly and annual frequencies Direction of Trade Statistics. Yearbook ,1968 **Direction of Trade Statistics Yearbook, 2018** International Monetary Fund. Statistics Dept.,2018-10-24 This paper discusses that shipments to and from free trade zones and bonded warehouses exclusion of military and other confidential items and government goods

value thresholds for customs registration of shipments returned goods and other goods missed by customs or surveys are examples of coverage differences that can result in inconsistencies. As a result of reporting and processing lags, trade data for a given period are often released before all customs documents for the period have been processed. These data are sometimes not revised or, if data are revised, errors are nevertheless made in assigning the date on which goods are shipped or received and the late data are assigned to the wrong month, quarter, and/or year. Errors can also be made in assigning a destination to exports and an origin to imports during customs clearances or in cases when the ultimate destination is changed after the initial consignment. During transshipment, the change is not incorporated into published statistics via the release of revised data.
