Lehmann,Yakov Malkiel,1982-01-01 This volume presents seven extensive essays by specialists in their respective fields of historical linguistics The first essay after the Introduction states the principles presented in Directions for Historical Linguistics 1968 and assesses the progress made since then towards constructing a general theory of language change Like the following essays on phonology and morphology it poses new questions that have arisen in the increasingly ambitious research Historical attention to discourse the topic of the next essay is virtually new though it too finds predecessors among philologists who devoted themselves to texts Finally two essays treat etymology one concentrating on the rigorously investigated Romance field the other on Indo European especially on new insights prompted by attention to Hittite   **Methodology of Socio-historical Linguistics** D. D. Jenset,Barbara McGillivray,2017-09-22 This book is an innovative guide to quantitative corpus based research in historical and diachronic linguistics Gard B Jenset and Barbara McGillivray argue that although historical linguistics has been successful in using the comparative method the field lags behind other branches of linguistics with respect to adopting quantitative methods Here they provide a theoretically agnostic description of a new framework for quantitatively assessing models and hypotheses in historical linguistics based on corpus data and using case studies to illustrate how this framework can answer research questions in historical linguistics The authors offer an in depth explanation and discussion of the benefits of working with quantitative methods corpus data and corpus annotation and the advantages of open and reproducible research The book will be a valuable resource for graduate students and researchers in historical linguistics as well as for all those working with linguistic corpora   *Introduction to Historical Linguistics* Anthony Arlotto,1981-01-09 Originally published by Houghton Mifflin in 1972 this introductory text deals with human language and its relationship to
