Discharges in Electronegative Gases Karl George Emeléus, G. A. Woolsey, 1970 **Discharges in Electronegative Gases** Karl George Emeléus, G. A. Woolsey, 1970 *Radio-Frequency Capacitive Discharges* Yuri P. Raizer, Mikhail N. Shneider, Nikolai A. Yatsenko, 2017-12-14 The first publication of its kind in the field this book describes comprehensively and systematically radio frequency rf capacitive gas discharges of intermediate and low pressure and their application to gas laser excitation and to plasma processing Text presents the physics underlying rf discharges along with techniques for obtaining such discharges experimental methods and results and theoretical and numerical modeling findings Radio Frequency Capacitive Discharges is written by well known specialists in the field authors of many theoretical and experimental works They provide simple and clear discussions of complicated physical phenomena A complete review on the state of the art is included This interesting new book can be used as a textbook for students and postgraduates and as a comprehensive guidebook by specialists Electron Kinetics and Applications of Glow Discharges Uwe Kortshagen, Lev D. Tsendin, 2006-04-11 This book resulted from the NATO Advanced Research Workshop on Electron Kinetics and Applications of Glow Discharges held in St Petersburg Russia on May 19 23 1997 Glow discharges have found widespread applications in many technological processes from the manufacture of semiconductors to recent developments in nanotechnology to the traditional fields of gas lasers and discharge lamps Consequently the interest in the physics of glow discharges has experienced yet another resurgence of interest While the non equilibrium character of glow discharges is widely accepted the opinion still prevails that the main features can be captured by fluid models and that kinetic treatments are only required for the understanding of subtle details The erroneousness of this belief is demonstrated by the failure of fluid models to describe many basic features of glow discharges such as for instance electrode phenomena striations and collisionless heating effects An adequate description of glow discharges thus has to be of kinetic nature *Electrical Breakdown and Discharges in Gases* Erich E. Kunhardt, Lawrence H. Luessen, 2013-03-09 The Advanced Study Institute on Breakdown and Discharges in Gases was held in Les Arcs France June 28 to July 10 1981 The object of the Institute was to provide a broad but comprehensive presentation of the various topics in the field of Gaseous electronics To achieve this goal a number of lectures seminars and panel discussions were scheduled Each topic was developed by two tutorial and or review lectures and brought to the present state of the topic by seminars and panel discussions The program of topics and speakers was selected with the assistance of the advisory committee composed of J A Rees European Coordinator England M Goldman French Coordinator France A H Guenther USA M Kristiansen USA and A V Phelps USA The most memorable aspect of the Institute was the sustained high interest of the faculty and participants for the two week period The daily schedule was demanding five hours of lectures two hours of seminars and one of discussion These sessions were often extended because of presentation by the participants of impromptu seminars The discussions were intense Majestic 10nt Blanc provided the

backdrop for the lecture hall and these surroundings and the weather contributed to the overall positive mood It was a wonderful occasion The lectures and seminars have been collected into two volumes Introduction to the Kinetics of Glow Discharges Chengxun Yuan, Anatoly A Kudryavtsev, Vladimir I Demidov, 2018-08-20 Electric glow discharges glows can be found almost everywhere from atmospheric electricity to modern plasma technologies and have long been the object of research The main purpose of this book is to provide simple illustrations of the basic physical mechanisms and principles that determine the properties of electric glow discharges It should enable readers to successfully participate in scientific and technical progress Discharges in Electronegative Gases, 1970 **Gaseous Electronics Conference Radio-Frequency Reference Cell** James K.
