but also that collectively they enhance our understanding of the classroom Important questions posed here include whether and if so how we can combine a Marxist or Foucauldian emphasis on the disciplinary and hegemonic practices of educational institutions with a Lacanian or Barthesian appreciation for the disruptive pleasures and drives that the unconscious produces within and through students teachers and classrooms Which theoretical and pedagogical innovations can help teachers and students to get the job done as well as to theorize the job to simultaneously practice education and imagine other forms and ends for education How can theory help us to historicize criticize and re draw the productive but sometimes disabling lines that make the classroom and its subjects A site for lively theoretical debate about these and related pedagogical issues this volume will prove useful for anyone wanting to reinterpret reinvent and reinvigorate the classroom
