Practical Virtual Team Building Ideas Ideas For Students:

Effective Technology Transfer In Biotechnology: Best Practice Case Studies In Europe Oliver Uecke, Robin De Cock, Bart Clarysse, Thomas Crispeels, 2015-01-06 Biotechnology is referred to as one of the key enabling technologies of the 21st century. It has the potential to offer solutions for a number of health and resource based problems the world is facing such as unmet medical needs and fossil fuel dependency. Considerable effort and investment has been expended in recent years to try and improve the outcomes of technology transfer in order to fulfill this potential. This book presents seventeen best practice case studies on the topic of effective technology transfer in biotechnology. The selected case studies focus on technology transfer offices, funding models, incubators, education and clusters. Each presents an overview of an initiative that was deployed in Europe with the aim of supporting and stimulating the transfer of biotechnology discoveries and technologies from research laboratories to society. Readers are provided with a critical assessment of each initiative and policy makers, entrepreneurs, cluster managers and research institute managers will find inspiring lessons they can draw on when developing and implementing similar initiatives elsewhere. These cases are the product of research undertaken as part of the ETTBio Effective Technology Transfer in Biotechnology project, co-financed by the European Union ERDF European Regional Development Fund and made possible by the INTERREG IVC Programme. ETTBio commenced in January 2012 and concluded in December 2014.

Engaging Virtual Environments Joanne Ricevuto, Laura McLaughlin, 2023-07-03 In a classroom setting, interaction among students is the norm. How do you replicate that informality, spontaneity and focus online? This book provides you with a framework to think about the different kinds of engagement you want to foster, whether participation, collaboration or quick feedback, and then introduces you to available online tools, some of which may be in your LMS. Offers practical tips and guides you to how to make the most of commonly available technologies to achieve your goals. Within the context and progression of a course, from developing a welcome page presenting yourself and the purpose of your course to icebreakers, assignments and alternative forms of assessment, the authors introduce you to a range of easy-to-use online tools that they have introduced to the faculty and teachers in their classes and that foster active learning and student engagement. In doing so, they provide a checklist that you can also access and print from the Web to help you review additional tools from the wide and ever-growing range of tools that are available online and determine whether they are appropriate for what you want to accomplish. This book will help you connect with students whether you're teaching synchronously or asynchronously, regardless of the devices students may be using. Develop community and introduce you to gamification to add enjoyment and variety to your students' experience of your class. Recognizing that using new tools with confidence requires practice, the authors offer ideas for implementing them in private online spaces. Each chapter concludes with reflection questions that can be addressed individually by the reader or within a learning community to encourage faculty to work together and support each other in virtual teaching and learning. This book addresses the challenge of
